2004 Dredging Conference

An aerial photograph of a coastal area, likely a harbor or estuary. The foreground shows a large, rectangular area of exposed, light-colored sediment or sand, possibly a seaway placement area, bordered by a breakwater. To the left, the ocean waves are breaking against a rocky shore. The background features a complex network of waterways, including a large canal or bay, and several smaller ponds or basins. There are some buildings and structures visible in the middle ground, suggesting a developed area. The overall scene is a mix of natural and man-made elements.
