Southwestern Division "Pacesetters"

2012 Texas Water Conservation

Association Meeting

BG Thomas Kula

Southwestern Division Commander

15 June 2012

US Army Corps of Engineers
BUILDING STRONG®

AGENDA

- Overview of Southwestern Division Missions
- Texas Ports Value to the Nation
- > Texas Coastal Initiative
- TransCanada Gulf Coast Pipeline
- Project
- Conclusions

Civil Works Mission Areas

Little Rock District's MV Ted Cook positions the Crane Barge Mike Hendricks at Dam 2 during the flood of 2011

Navigation (Inland)

2 major waterways (GIWW and MKARNS)

Water Supply

•8.4 million acre-feet of water storage •Water control contracts = water for 1.8 million households

Sardis Dam, Oklahoma

Bull Shoals

produce 6.7 billion kw hours •87% of regional capacity, third in the Corps

Powerhouse, TULSA DISTRICT **Arkansas**

Flood Damage Reduction

•74 flood damage reduction lakes/reservoirs •33.22M acre-feet of flood storage •760 miles of local flood protection projects •\$85 B in cumulative flood damage prevention

Dallas Floodway

Recreation

20 percent of the Corps' total recreation projects located within the regional boundary 83 million visitors at 90 operating projects located in five states

Moonshine Beach, Table Rock Lake, Mo.

Regulatory (work in waters & wetlands)

•Over 5000 permit decisions annually Protection of waters & wetlands

> Regulators examine soils on a wetland delineation field visit.

Houston Ship Channel

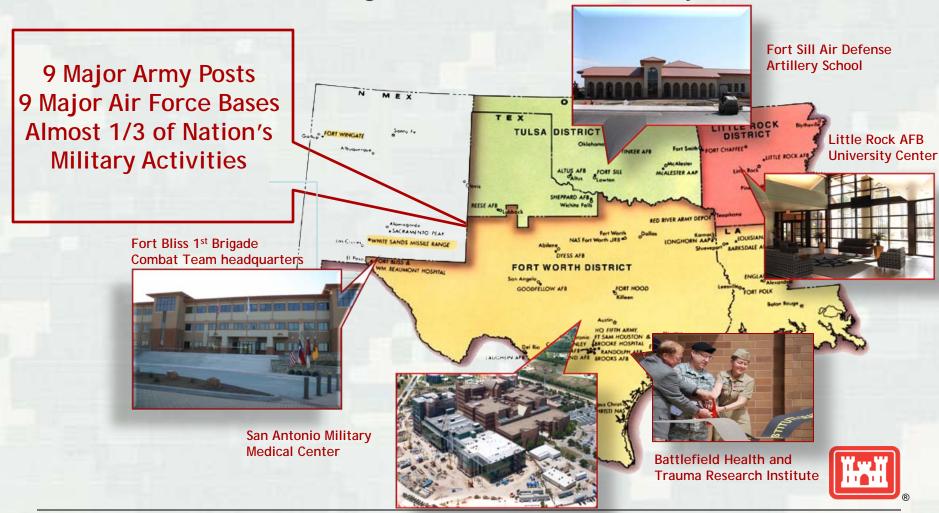

Navigation (Ports and Channels)

- •4 of the Nation's "Top Ten" ports
- •32 channels (15 deep draft, 17 shallow draft)
- •More than 500 M tons of commerce annually

Military Program Mission Areas •Engineering •Construction •Installation Support

•Environmental management services for the Army & Air Force

Texas Navigation System

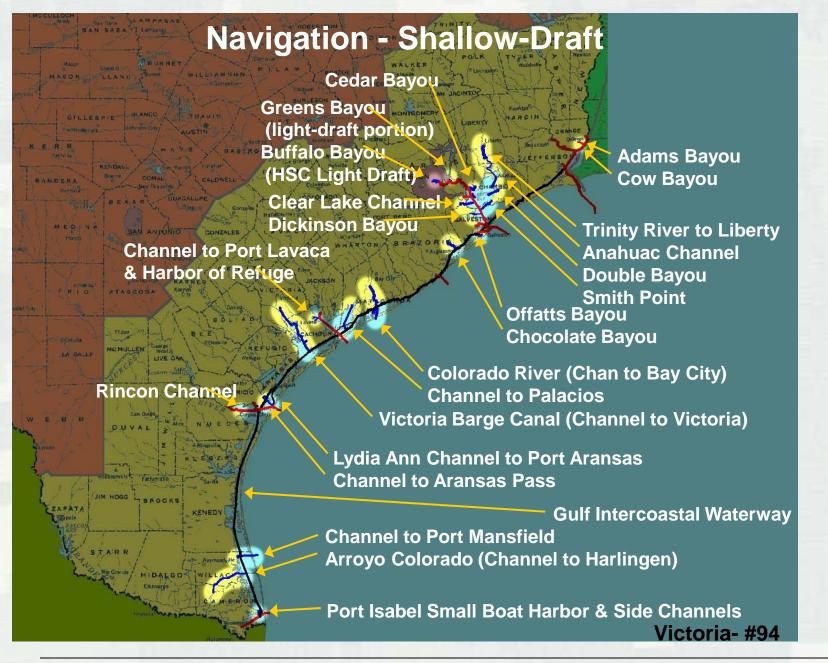

- 1,000 miles of navigation channels w/ assoc. jetties and placement areas
 - ▶ 240 m. of deep draft (> 20 feet)
 - ► 760 m. of shallow draft (GIWW & tributary channels)
- 13 shallow draft ports
- 15 deep draft ports
- Texas Ports move 575M Tons annually
- Contract w/industry to maintain project depths on the waterways.
- Use dredged material beneficially where possible; beach nourishment, marshes filling and creation, bird islands, etc.

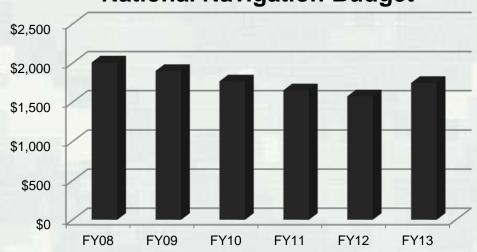

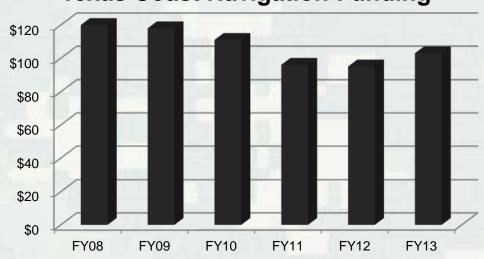

NAVIGATION FUNDING

Texas Coast Navigation Funding

22.2% of Nation's Total Export tonnage (maritime)

43.4% of Imported crude oil (maritime)

Texas is the Nation's #1 State for Waterborne Commerce (Major Ports = 521.5M Tons worth \$314.7B) - [source - IWR]

Coastal Texas Ecosystem Protection & Restoration

- Texas coast at significant risk of damages to public safety, property, and ecological resources from storms, sea level rise and other coastal hazards.
 - 18 counties home to 26% of state's population
 - 4 of Nation's top 10 ports located in Texas
 - Two-thirds of nation's petrochemicals produced along the Texas coast
 - 64% of Texas coast is eroding at average rate of 5.9 feet/year with some areas losing 30 feet/year

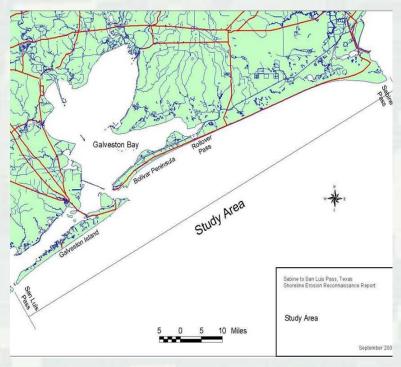

- Study integrates: programmatic plans for flood damage reduction; storm damage protection; ecosystem restoration; risk reduction measures for damages to public safety, property and environmental resources from storms and erosion
- Plan would provide: Basis for informed decision-making by the Federal government and non-Federal sponsors

Sabine Pass to Galveston Bay, TX

- Post Hurricane Ike SEP 2008: the study area was assessed; determined that the entire area was significantly altered both physically and economically
- Initiated a 100% Fed cost re-scoping effort to expand study area to a six County region in Southeast Texas
- Four regional scoping meetings scheduled for late February and early March 2012; collect input from the public, resource agencies and other stakeholders

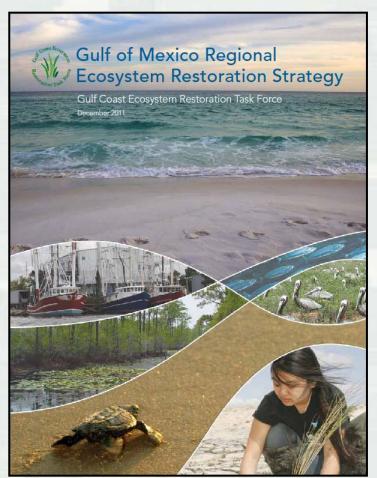

- Culmination of re-scoping will result in a new Project Management Plan (PMP) and Feasibility Cost Sharing Agreement (FCSA) with new non-Federal Sponsor – the Texas General Land Office (GLO)
- o An executed FCSA is scheduled for June 2012
- Re-initiation of feasibility will commence in July 2012

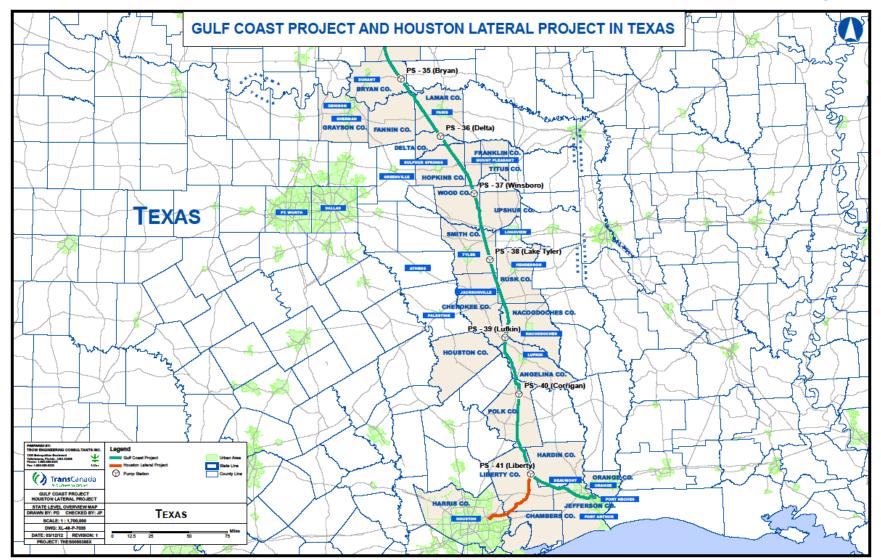

Coastal Texas Ecosystem Protection & Restoration Study Status

- Texas General Land Office expressed support as potential sponsor in 2011
- Study included as major recommended action in Gulf of Mexico Regional Ecosystem Restoration Strategy (2011)
- New Start Reconnaissance Study was requested for FY 13
- o FY 13 appropriation uncertain at this time

TransCanada Gulf Coast Pipeline Project

CONCLUSIONS

- Texas is a **ready and supportive** partner for federal investment into required **navigation improvements** which have national benefits
- Keys to success
 - > Port partnerships
 - Partnership with Dredging Industry
 - > Managing expectations
 - > Strategic communications
 - Facilitating private investment (risk reduction)
- Texas is in **desperate need** of comprehensive coastal study to **mitigate hurricane** risks
