

STEM INSPIRATION

Kim K. Cheung, M.D., Ph.D.
Department of Pediatrics
University of Texas Medical School at Houston

Pursuing your dream begins here.

Who inspired you?

“My mother was a school principal and she had encouraged me to pursue a professional career. In high school, I was fascinated by the sciences and did extra dissections at home! While I was pre-med in college, I was inspired by my chemistry professor, Dr. Mohrig, and did some really exciting basic science research with him. So, I studied both: biochemistry and medicine. I love the practice of pediatrics and my biochemistry research trained me to have critical thinking.”

Education

Bachelor of Arts in Biology, Carleton College, Minn.; Master and doctoral degrees in Biochemistry, Princeton University, N.J.; and Doctor of Medicine, Tulane Medical School, La.

U.S. Army Corps of Engineers Galveston District
