

STEM INSPIRATION

Forrest Knowlton

Vice President

Product & Release Management for
Spendvision, a global software company

Pursuing your dream begins here.

Who inspired you?

"I grew up in Silicon Valley in the '70s. My parents worked in technology, my friends' parents worked in technology and our schools focused on technology; in short, my generation was expected to pursue an education and career in technology and for that I am eternally grateful. I have never actually worked as an engineer despite my degree but served as a Marine Corps aviator, a program manager, product development director and an executive in a technology company. The true benefit of a STEM education is that a degree in STEM opens every door. In STEM, you learn how to solve problems, how to think critically and how to change the world around you. No matter where you go in life, a STEM degree is a fantastic beginning."

Education

Bachelor's degree in Mathematics & Applied Science (Engineering) from UCLA

U.S. Army Corps of Engineers Galveston District
www.swg.usace.army.mil
