

STEM INSPIRATION

Sherronia Thomas
Operations Research Analyst
U.S. Army Operational Test Command
Fort Hood, Texas

Pursuing your dream begins here.

Who inspired you?

"My parents instilled in me the importance of obtaining an education since neither parent was afforded the opportunity to pursue one. My initial study was in the accounting field since I liked math and was good in it. After being introduced to the computer science field through friends, I realized this was an area I wanted to pursue. After working as a programmer, I became fascinated with being an operations research analyst. Working as an operations research analyst provided the ability to apply my mathematical skills along with programming abilities."

Education

Master of Science in Computer Information Systems, Texas A&M University - Central Texas

U.S. Army Corps of Engineers Galveston District
