

STEM INSPIRATION

Dr. Valerie Meyers

**Space Food Chemist
NASA Johnson Space Center
Houston**

Pursuing your dream begins here.

Who inspired you?

"I was so fortunate to have such a strong support network of family, friends, and teachers that it's difficult for me to point to a single person who inspired me to pursue STEM. However, I can say that my experience as a camper at Space Camp was the tipping point between dream and reality for me. They have a sign on the habitat that says 'Through these doors enter America's future astronauts, scientists, and engineers', and passing through those doors, I truly believed that was my future."

Education

Bachelor's degree in chemistry from Texas A&M University and a doctorate in pathology from the University of Alabama at Birmingham.

U.S. Army Corps of Engineers Galveston District
