

PROPOSED INS MCALLEN SECTOR HEADQUARTERS
EDINBURG, HILDALGO COUNTY, TEXAS
PHASE I SITE ASSESSMENT

AUGUST 2002

PROPOSED INS MCALLEN SECTOR HEADQUARTERS, EDINBURG, HILDALGO COUNTY, TEXAS

This limited Phase I Site Assessment is being conducted 12 August 2002 by CESWG-PE-PR personnel to determine whether hazardous materials have impacted subject property including spillage, storage or disposal of material. The purpose of this assessment is to provide the INS with an environmental clearance for real estate proposed for construction of a new sector headquarters. Work was performed under the Support For Others program. The Assessment consists of a review of regulatory agency's databases, interviews, a review of historical aerial photos, and a site visit on 11 and 12 February 2002.

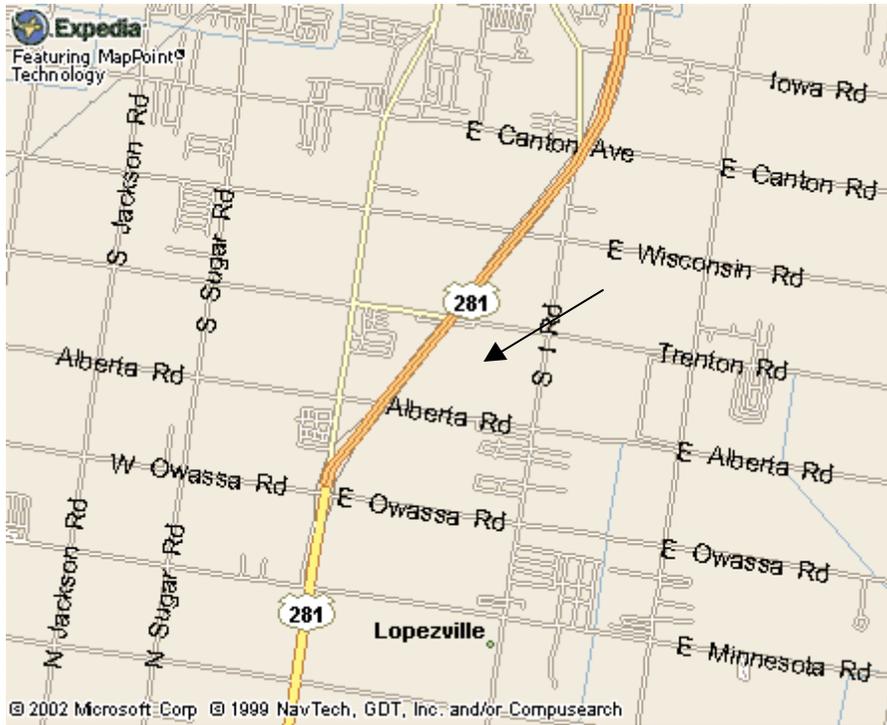

The 31.8-acre undeveloped parcel is located at the southeast corner of the intersection of State Highway 281 and East Trenton Road in Edinburg, Texas. The site is undeveloped rural agricultural land. East Trenton Road, an overhead power line and agricultural land borders the north boundary; a 16" irrigation line in a 65' canal Right of Way, and undeveloped land with some residential structures are on the east side; agricultural land and a fenced 2-acre gas well site are on the south side; and SH 281, and overhead power line and agricultural land are on the west boundary. According to a recent survey plat, Samson Lone Star L. P. owns the gas well, with a 40' pipeline easement to Reliant Energy Fields Services, Inc. The pipeline runs east from the well site. The plat indicates there are 2-6" tile drains running east-west on the western half of the parcel and running north-south on the west side is a 12" drain line which lies inside a 30' easement to H.C.I.D. A north to south county road divides the proposed property. Paralleling the caliche county road is an overhead power line, 2" water line (N.A.W.S.C.), and telephone line.

Regulatory data and aerial photos were acquired from TelAll, a commercial database research company. A review of the State and Federal regulatory data identified a RCRA small quantity generator, 2 leaking underground storage tanks, 4 underground storage tanks and one unpermitted landfill containing household waste are located one quarter to one half mile from the proposed property.

A review of historical aerials (1939 - 1993) shows the property and adjacent land was used primarily for agriculture. Residential development didn't start encroaching on the area until about the mid-50's. Under construction in 1977, Hwy 281 cuts through the northwest section of the proposed tract. Significant residential and some commercial development has occurred in surrounding areas by 1967. Land use in the area has not changed significantly since 1967.

Conclusions. The gas well is excluded from the proposed parcel and shouldn't present a hazard. None of the identified underground storage tank sites are close enough to impact the proposed property. The location of the landfill could not be pinpointed but it was determined that it was not located on or adjacent to

the proposed property. The condition and age of electrical transformers associated with the power lines bordering the property should be checked to insure there is no leakage of PCB containing substance. No other HTRW investigations are warranted at this time.

Preface

This document of environmental concerns near Hwy 281, Edinburg, TX reports findings of the TelALL data search, prepared on the request of US Army Corp Of Engineers.

TelALL Corporation (TelALL) has designed this document to comply with the ASTM standard E 1527 - 00 sec.7.1.3 (Accuracy and Completeness) and has used all available resources but makes no claim to the entirety or accuracy of the cited government records. Our databases are updated at least every

90 days or as soon as possible after publication by the referenced governmental agencies (ASTM 1527 - 00 sec. 7.1.7). The following fields of governmental databases may not represent all known, unknown or potential sources of contamination to the referenced site. Many different variables effect the outcome of the following document. TelALL maintains extremely high standards, and stringent procedures that are used to search the referenced data. However, TelALL reserves the right at any time to amend any information related to this report.

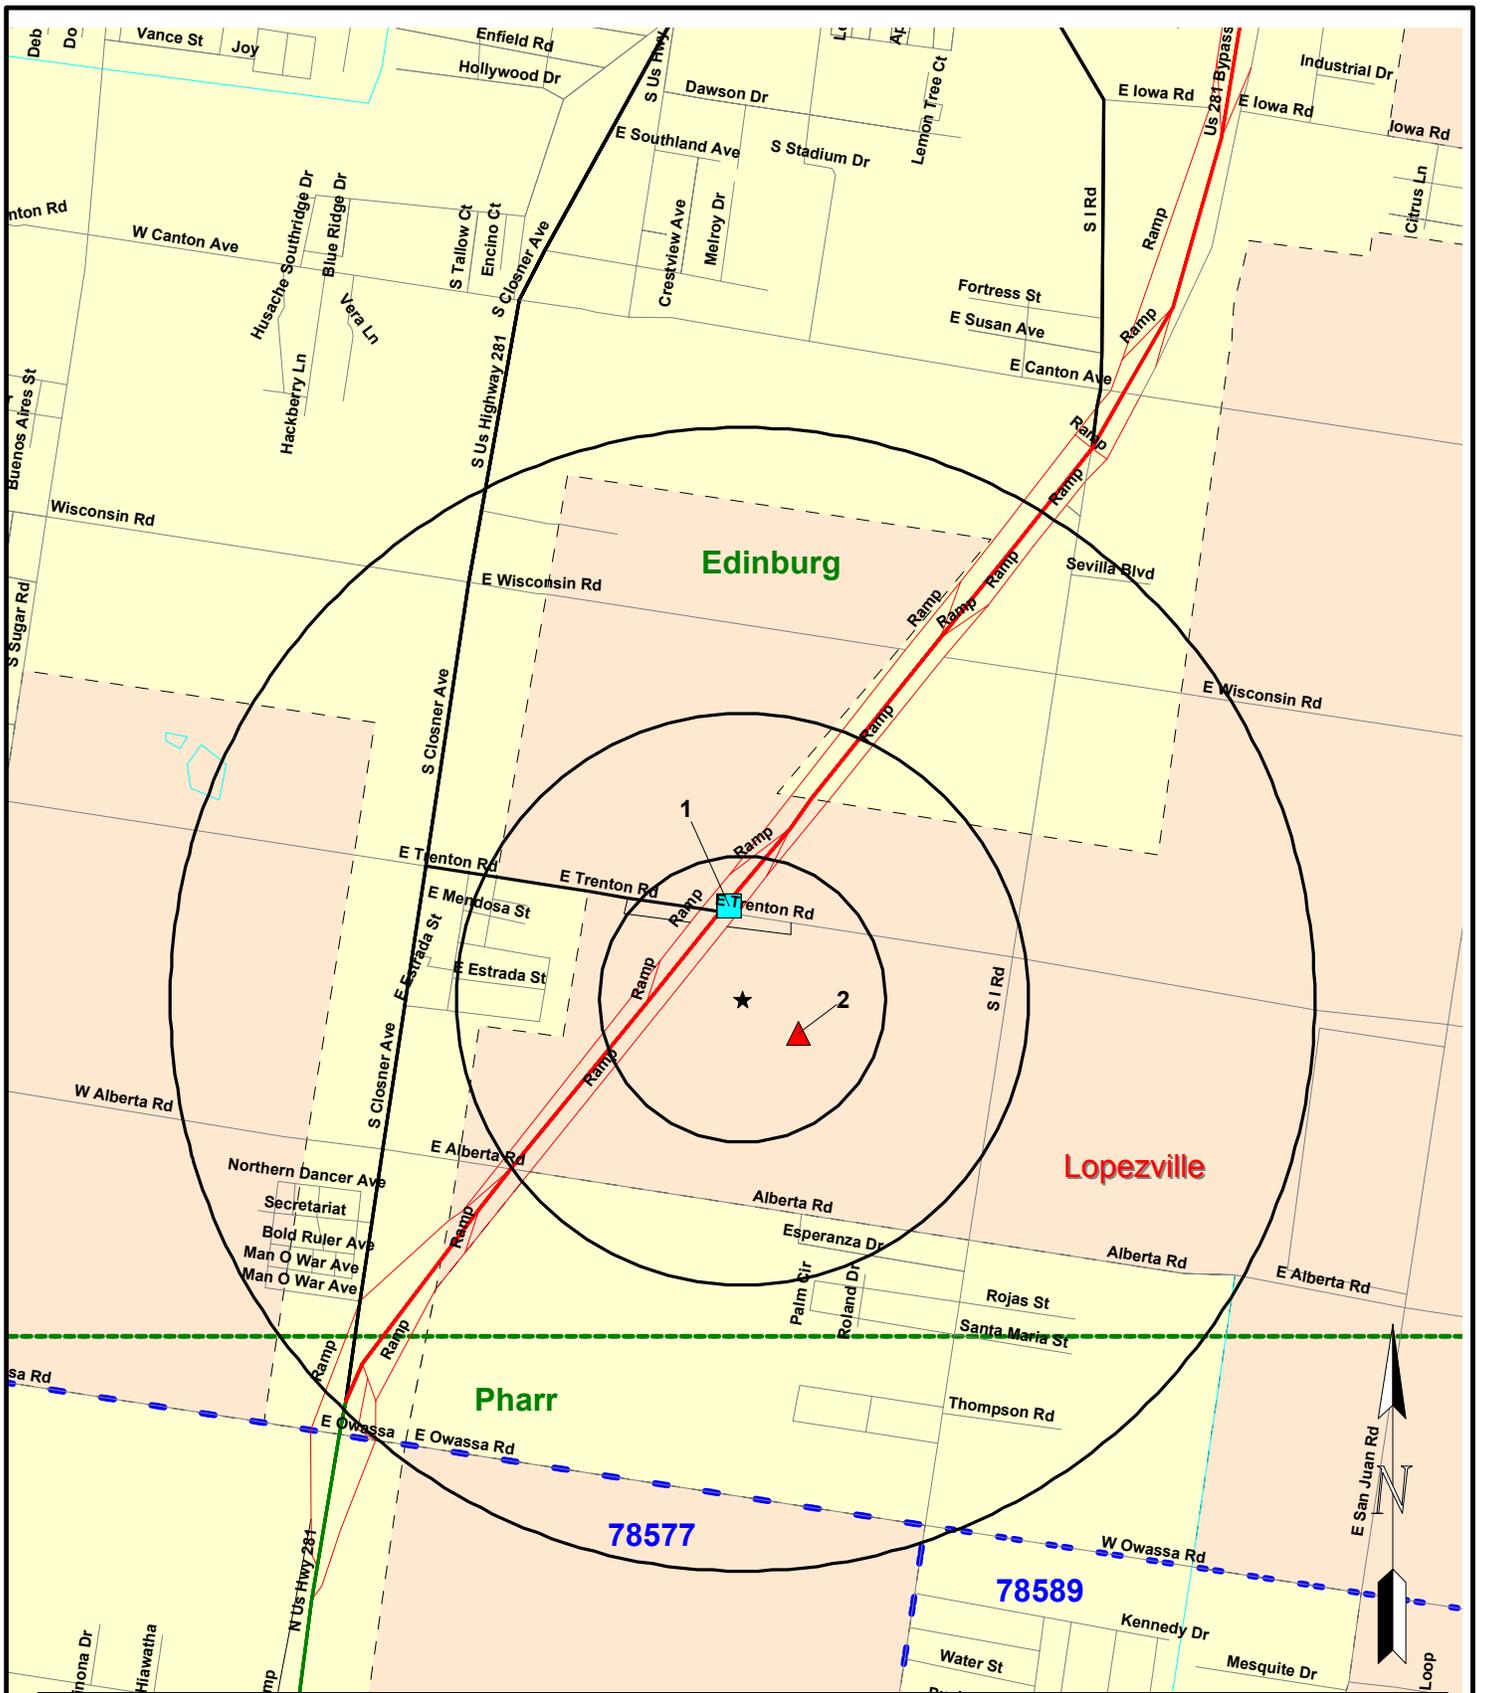

If there is a need for further information regarding this report, or for any customer support please call TelALL at 800 583-0004 for assistance.

This report is divided into the following components:

- MAP** Identified geocodeable findings relative to this data search.
- SUMMARY 1** Sorting of the identified sites by distance from the subject site.
- FINAL** A description of each database and a detailed explanation of findings.

NPL

National Priority List

NPL is a priority subset of the CERCLIS list. (See CERCLIS, below) The Cerclis list was created by the Comprehensive Environmental Response, Compensation and Liability Acts (CERCLA) need to track contaminated sites. CERCLA was enacted on 12/11/80, and

amended by the Superfund Amendments and Reauthorization Act of 1986. These acts established broad authority for the government to respond to problems posed by the release, or threat of release of hazardous substances, pollutants, or contaminants. CERCLA

also imposed liability on those responsible for releases and provided the authority for the government to undertake enforcement and abatement action against responsible parties.

CERCLIS

Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS is the official repository for site and non-site specific Superfund data in support of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). It contains information on hazardous waste site assessment and remediation

from 1983 to the present. CERCLIS information is used to report official Superfund accomplishments to Congress and the public, assist EPA Regional and Headquarters managers in evaluating the status and progress of site cleanup actions, track Superfund

Comprehensive Accomplishments Plan (SCAP), and communicate planned activities and budgets.

ERNS

Emergency Response Notification System

ERNS supports the release notification requirements of section 103 of the Comprehensive Environmental Response Compensation, and Liability Act (CERCLA), as amended; section 311 of the Clean Water Act; and sections 300.51 and 300.65 of the National Oil and Hazardous Substances Contingency Plan.

Additionally, ERNS serves as a mechanism to document and verify incident-location information as initially reported, and is utilized as a direct source of easily accessible data, needed for analyzing oil and hazardous substances spills.

TXVCP

Texas Voluntary Cleanup Program

Created under HB 2296, The Texas Voluntary Cleanup Program (VCP) was established on 9/01/1995 to provide administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas. Since future lenders and landowners receive

protection from liability to the State of Texas for cleanup of sites under the VCP, most of the constraints for completing real estate transactions at those sites are eliminated. As a result, many unused or under used properties may be restored to economically productive or community beneficial uses. After cleanup, the parties receive a certificate of completion from the TNRCC which states that all lenders and future land owners who are not PRP's are released from all liability to the State.

Parts of the above description were taken from the TNRCC/VCP Website. (<http://www.tnrcc.state.tx.us/permitting/remed/vcp/>)

The investigation phases are listed as INVESTIGATION, REMEDIATION, POST-CLOSURE, and COMPLETE.

TXIOP

Innocent Owner/Operator Program

The TX IOP, created by House Bill 2776 of the 75th Leg, provides a cert. to an innocent owner or operator if their property is contaminated as a result of a release or migration of contaminants from a source or sources not loc. on the prop., and they

did not cause or contribute to the source or sources of contamination. Like the TxVCP Prog., the IOP can be used as a redevelopment tool or as a tool to add value to a contaminated prop. by providing an Innocent Owner/Operator Certificate (IOC). However,

unlike the VCP release of liability, IOCs are not trans. to future owners/oper's. Future owners/oper's are eligible to enter the IOP and may rec. an IOC only after they become an owner or operator of the site.
