of Engineers** ®
Galveston District

BIOGRAPHY

Nick Laskowski
Chief, Programs Branch
U.S. Army Corps of Engineers Galveston District

Nick Laskowski is currently serving as the U.S. Army Corps of Engineers (USACE) Programs Branch Chief. Before that, he was a senior project manager at the Galveston District.

Laskowski's background consists of extensive experience within USACE's Regulatory Program where he served a range of positions. Most recently, he serves as the Corpus Christi Regulatory Field Office chief. As project manager he is responsible for managing several deep draft navigation projects, to include the Corpus Christi Ship Channel (CCSC), Freeport Harbor, and the Brazos Island Harbor.

He successfully managed the completion of the CCSC 2015 Limited Reevaluation Report, the Freeport Harbor General Evaluation Report, and initiated the CCSC new work construction project as well as coordinating the Brazos Island Harbor Engineering and Design reviews and future project studies.

Laskowski earned a Bachelor of Science in Agronomy from Texas A&M University in 2001 and a Masters in Soil Science in 2004.

His career started in private industry performing wetland delineation and managing environmental components of residential and commercial development projects.

Laskowski began his USACE career in 2007, where he worked as in regulatory compliance and enforcement. He later moved to Corpus Christi and served as the subject matter expert for wetland delineation.

He is a licensed Professional Geologist and a certified Professional Wetland Scientist.
