**Andrew Weber, PE, PMP**  
Deputy Branch Chief,  
Project Management  
U.S. Army Corps of Engineers Galveston District

Andrew Weber currently serves as the U.S. Army Corps of Engineers (USACE) Galveston District's deputy branch chief for project management.

He began his career in 2009 as a civil engineer and has since worked on a variety of navigation, flood risk management, and environmental restoration projects all along the Texas coast.

Weber's major projects include include the Addicks and Barker Dams Safety Modification Project and the Buffalo Bayou and Tributaries Resiliency Study. He's also played a prominent role in the Galveston District's Dam Safety, Levee Safety, and Bridge Safety Programs.

His past projects include the Sabine Neches Waterway Channel Improvement Project, the Galveston Sand Management and Erosion Study, and managing the Galveston District's Continuing Authorities Program and Planning Assistance to States Program.

Weber earned a Bachelor of Science in Civil Engineering and a Certificate in Leadership Study and Development from Texas A&M University.

He also holds a professional engineering license in the state of Texas and is also a certified Project Management Professional.
