

David Lowe
Principal
B.G.E., Inc.

David Lowe has 31 years of engineering experience engaging in public policy issues and covering the full range of project development from master planning to construction management. He has designed and constructed roadways, storm sewers, drainage and flood control facilities, water distribution systems, wastewater collection systems, water supply plants, wastewater treatment plants, and recreational facilities. Mr. Lowe has provided services to both public and private clients throughout the Greater Houston region.
