BIOGRAPHY

Bernice Taylor
Chief
Project Scheduling Section
U.S. Army Corps of Engineers Galveston District

Bernice Taylor is the Chief of the Project Scheduling Section of the Programs Branch, US Army Corps of Engineers Galveston District.

Her career began in the Huntington District, US Army Corps of Engineers in 2000 working for the Water Quality Section, Water Resources Branch. She began managing the Water Quality sampling contract and the sampling program for the local selective withdraw lakes. Bernice came to the Galveston District in 2007 and soon found her way into project scheduling. During her twelve years in project scheduling she has worked on projects such as the Houston Ship Channel Feasibility Study, Sabine Pass to Galveston Bay, and the Coastal TX project.

As the Chief of Project Scheduling, Bernice is responsible for managing the P2 Scheduling Program, District Training for all users of our scheduling software, as well as Data Quality Control. Bernice has been working in project scheduling for the past twelve years and in that time she has had the opportunity to design a number of project templates while earning experience in both civil works, and military programs. As the Chief of Project Scheduling, Bernice is responsible for leading a team of ten schedulers while maintaining data integrity.

Bernice is a native of Houston, TX, she earned a degree in business administration in 2001. When she is not at work you can find her spending time with family, hiking, camping, and doing DIY projects.
