## **David H. Mackintosh**

Chief, Houston Project office

U.S. Army Corps of Engineers Galveston District

David H. Mackintosh is the Chief of the Houston Project Office for the U.S. Army Corps of Engineers Galveston District, a position he assumed in April 2021.

A 13-year USACE veteran, Mr. Mackintosh currently oversees the operations and management of Addicks and Barker Reservoirs and the Wallisville Lake Project.

Prior to accepting his current position, Mr. Mackintosh served as the Lead Ranger at Addicks and Barker Reservoirs since May of 2017. During his tenure he spent his time engaging with the public regarding the inner workings of how the two normally dry reservoirs perform and their history as it relates to the development of the region. The reservoirs and associated dams serve as a key component to the overall Flood Risk Reduction system within the nation's 4th largest city. In addition, to the day to day tasks, Mr. Mackintosh also spent his time fostering the growth and development of his Ranger team.

He has been a USACE employee since 2009. His background consists of extensive experience within the Corps of Engineers, ranging from natural resource management, Park Ranger in Fort Worth District, Emergency Management quality assurance field inspector, and Leadership Development Program manager.

He earned a Bachelor of Science in Forestry from Stephen F. Austin State University in 2008.

David also spends much of his time in the outdoors fishing and hunting with his wife, two daughters (aged 9 and 6), and hunting dog. David also enjoys time spent at his friend's ranches across Texas.
