

# U.S. Army Corps of Engineers Galveston District Regulatory Branch

## Felicity Cunningham

Felicity Cunningham is a Regulatory Project Manager, with the Galveston District, and the Program Coordinator for the Regulatory WRDA 214 Program. Ms. Cunningham manages all the active Regulatory WRDA 214 agreements for the Galveston District and has written 214 Memorandums of Agreement for multiple Entities. She routinely coordinates with other Corps Districts and Headquarters in developing new Agreements and streamlining the WRDA 214 process.

Ms. Cunningham works in the Policy and Analysis Branch of the Regulatory Division and has over 20 years experience evaluating Department of Army Permits, ranging from Nationwide Permits to Individual Permits and Environmental Impact Assessments in cooperation with other Federal Agencies. She also has specialized experience managing permitting for Energy Projects, Mitigation Banking, Inland and Offshore dredge material placement, and Superfund Sites. In her position as Regulatory Project Manager, Ms. Cunningham strives to teach the DA permitting process with clarity and transparency so that applicants and permittees can forecast realistic project management schedules and requirements.

Ms. Cunningham is a graduate of Texas A&M University with a Bachelor of Science Degree in Marine Sciences, and an emphasis in coastal processes. When not working on Corps projects, she is an avid coastal and lifestyle photographer and volunteers with her son's high school Marching Band.
