BIOGRAPHY

Kenneth Darko-Kagya, Ph.D., P.E., P.G.,
Dam Safety Program Manager
U.S. Army Corps of Engineers Galveston District

Kenneth Darko-Kagya is a registered professional engineer and geoscientist currently working with the Galveston District as the Dam Safety Program Manager. He has over 10 years of experience in design, construction, assessment and rehabilitation of dams and hydraulic structures.

Kenneth has been involved in various dam/levee safety modification projects for the U.S. Army Corps of Engineers including Bolivar Dam, Mohawk Dam, Zoar Levee and Addicks and Barker Dams. In 2017 Kenneth was deployed to assist the warfighters on Dam assessments in Kuwait and also supported the rehabilitation of Mosul Dam in Iraq. He supported response efforts after Hurricane Irma and flooding in Baton Rouge.

Kenneth Darko-Kagya possess a Bachelor of Science in “Geological Engineering” from Kwame Nkrumah University of Science and Technology, Ghana. He holds a post Baccalaureate Certificate in “Risk Assessment and Risk Management” from Notre Dame of Maryland University and a “Doctor of Philosophy” (PhD) in “Civil Engineering” from University of Illinois at Chicago.
