APPENDIX J

DRAFT GENERAL CONFORMITY DETERMINATION

AUGUST 2017

The Draft General Conformity Determination (DGCD) will be developed after the release of this Draft Integrated Feasibility Report and Environmental Impact Statement during the next planning phase, when a specific dredged material management plan (DMMP) for the Tentatively Selected Plan (TSP) is developed. Refinements to the TSP during the next planning phase will affect the final size and extent of the channel modifications, and therefore will affect the dredged quantities, pumping distances, and placement sites selected that significantly affect the estimate of construction air emissions. Therefore, the DGCD will be prepared after the specific DMMP for the TSP is developed
