<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** Based on a review of data listed in Section III above, the Corps has determined that there are no aquatic resources or potential aquatic resources in the approximately 4.1-acre review area that exhibit lateral limits of jurisdiction (e.g. ordinary high water mark or high tide line) that would warrant the application of a wetland delineation, significant nexus analysis, navigability determination, or delineation of the ebb and flow of the tides.
