warrant the application of a wetland delineation, significant nexus analysis, navigability determination, and/or delineation of the ebb and flow of the tides. There are no features that have lateral limits of jurisdiction (e.g., OHWM). Based on historical aerial imagery from Google Earth the proposed site has been used primarily for residential use and the location of the proposed drainage improvements are within the boundary of the existing street right of way (ROW) and lacks any wetland parameters (hydric soils, hydrophytic vegetation, and wetland hydrology).
