the tides. There are no features that have lateral limits of jurisdiction. (e.g., OHWM). Based on historical aerial imagery from Google Earth and topographic maps, the proposed site has been used primarily for residential use for at least 23 years within an urban area that lacks any hydrological connections to navigable waters. Work primarily involves the maintenance of man-hole covers within existing road right-of-ways (ROW) that are without any apparent wetland signatures or wetland parameters (hydric soils, hydrophytic vegetation, and wetland hydrology).
