I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 3/12/2021
 ORM Number: SWG-2019-00125
 Associated JDs: N/A
 Review Area Location¹: State/Territory: Texas City: Pearland County/Parish/Borough: Brazoria
 Center Coordinates of Review Area: Latitude 29.540958 Longitude -95.408697

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
Culvert 01	0.016	acre(s)	(b)(1) Water or water feature that is not identified in (a)(1)-(a)(4) and does not meet the other (b)(1) subcategories.	Culvert 01 is an underground or buried portion of a constructed or excavated channel network used to convey surface water. Historic topographic quadrangle maps and aerial photos confirm the drainage network neither relocates, nor was constructed in an (a)(1-4) water. Therefore, this feature meets the 33 CFR 328.3(b)(1) exclusion.
Culvert 02	0.004	acre(s)	(b)(1) Water or water feature that is not identified in (a)(1)-(a)(4) and does not meet the other (b)(1) subcategories.	Culvert 02 is an underground or buried portion of a constructed or excavated channel network used to convey surface water. Historic topographic quadrangle maps and aerial photos confirm the drainage network neither relocates, nor was constructed in an (a)(1-4) water. Therefore, this feature meets the 33 CFR 328.3(b)(1) exclusion.
Culvert 03	0.004	acre(s)	(b)(1) Water or water feature that is not identified in (a)(1)-(a)(4) and does not meet the other (b)(1) subcategories.	Culvert 03 is an underground or buried portion of a constructed or excavated channel network used to convey surface water. Historic topographic quadrangle maps and aerial photos confirm the drainage network neither relocates, nor was constructed in an (a)(1-4) water. Therefore, this feature meets the 33 CFR 328.3(b)(1) exclusion.
Culvert 04	0.008	acre(s)	(b)(1) Water or water feature that is not identified in (a)(1)-(a)(4) and does not meet the other (b)(1) subcategories.	Culvert 04 is an underground or buried portion of a constructed or excavated channel network used to convey surface water. Historic topographic quadrangle maps and aerial photos confirm the drainage network neither relocates, nor was constructed in an (a)(1-4) water. Therefore, this feature meets the 33 CFR 328.3(b)(1) exclusion.
Culvert 05	0.003	acre(s)	(b)(1) Water or water feature that is not identified in (a)(1)-(a)(4) and does not meet the other (b)(1) subcategories.	Culvert 05 is an underground or buried portion of a constructed or excavated channel network used to convey surface water. Historic topographic quadrangle maps and aerial photos confirm the drainage network neither relocates, nor was constructed in an (a)(1-4) water. Therefore, this feature meets the 33 CFR 328.3(b)(1) exclusion.
Culvert 06	0.004	acre(s)	(b)(1) Water or water feature that	Culvert 06 is an underground or buried portion of a constructed or excavated channel network

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

Pond 01	0.090	acre(s)	(b)(8) Artificial lake/pond constructed or excavated in upland or a non-jurisdictional water, so long as the artificial lake or pond is not an impoundment of a jurisdictional water that meets (c)(6).	Pond 01 is an artificial aesthetic feature constructed or excavated in upland or non-jurisdictional waters. Historic topographic quadrangle maps and aerial photos confirm the pond was constructed in uplands between 2006 and 2008 associated with site construction and development. Therefore, this feature meets the 33 CFR 328.3(b)(8) exclusion.
