	Applicable/supporting scientific literature: Click here to enter text.					
П	Other information (please specify): Click here to enter text.					

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Based on our desktop review there does not appear to be any potential aquatic resources connectivity into the review area that would warrant conducting a wetland delineation, significant nexus analysis, navigability determination, and/or delineation of the ebb and flow of the tides. There are no visible features present on the site that would affect the lateral limits of jurisdiction (e.g., OHWM). Therefore, the review area is not considered jurisdictional under Section 404 of the Clean Water Act (CWA).

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
