GALVESTON, TEXAS 77550

CESWG RD-Central

22 December 2025

MEMORANDUM FOR RECORD

SUBJECT: US Army Corps of Engineers (Corps) Pre-2015 Regulatory Regime
Approved Jurisdictional Determination in Light of *Sackett v. EPA*, 143 S. Ct. 1322
(2023),¹ SWG-2024-00054

BACKGROUND. An Approved Jurisdictional Determination (AJD) is a Corps document stating the presence or absence of waters of the United States on a parcel or a written statement and map identifying the limits of waters of the United States on a parcel. AJDs are clearly designated appealable actions and will include a basis of JD with the document.² AJDs are case-specific and are typically made in response to a request. AJDs are valid for a period of five years unless new information warrants revision of the determination before the expiration date or a District Engineer has identified, after public notice and comment, that specific geographic areas with rapidly changing environmental conditions merit re-verification on a more frequent basis.³ For the purposes of this AJD, we have relied on section 10 of the Rivers and Harbors Act of 1899 (RHA),⁴ the Clean Water Act (CWA) implementing regulations published by the Department of the Army in 1986 and amended in 1993 (references 2.a. and 2.b. respectively), the 2008 *Rapanos-Carabell* guidance (reference 2.c.), and other applicable guidance, relevant case law and longstanding practice, (collectively the pre-2015 regulatory regime), and the *Sackett* decision (reference 2.d.) in evaluating jurisdiction.

This Memorandum for Record (MFR) constitutes the basis of jurisdiction for a Corps AJD as defined in 33 CFR §331.2. The features addressed in this AJD were evaluated consistent with the definition of “waters of the United States” found in the pre-2015 regulatory regime and consistent with the Supreme Court’s decision in *Sackett*. This AJD did not rely on the 2023 “Revised Definition of ‘Waters of the United States,’” as amended on 8 September 2023 (Amended 2023 Rule) because, as of the date of this decision, the Amended 2023 Rule is not applicable in Texas due to litigation.

1. SUMMARY OF CONCLUSIONS.

¹ While the Supreme Court’s decision in *Sackett* had no effect on some categories of waters covered under the CWA, and no effect on any waters covered under RHA, all categories are included in this Memorandum for Record for efficiency.

² 33 CFR 331.2.

³ Regulatory Guidance Letter 05-02.

⁴ USACE has authority under both Section 9 and Section 10 of the Rivers and Harbors Act of 1899 but for convenience, in this MFR, jurisdiction under RHA will be referred to as Section 10.

a. Provide a list of each individual feature within the review area and the jurisdictional status of each one (i.e., identify whether each feature is/is not a water of the United States and/or a navigable water of the United States).

1. Aquatic Features identified in the submitted delineation

Summary of Wetlands and Waterbodies Identified within the Survey Area				
Resource Name	Classification	Size (acres)	Jurisdiction	Coordinates
Wetland 1	PFO	0.3	Non-adjacent, non-jurisdictional	30.142438°, -95.428342°
Wetland 2	PFO	0.05	Non-adjacent, non-jurisdictional	30.142052°, -95.428183°
Wetland 3	PFO	0.23	Non-adjacent, non-jurisdictional	30.142788°, -95.431057°
Wetland 4	PFO	0.42	Non-adjacent, non-jurisdictional	30.143146°, -95.432028°
Wetland 5	PFO	0.63	Non-adjacent, non-jurisdictional	30.142049°, -95.432387°
Wetland 6	PFO	0.24	Non-adjacent, non-jurisdictional	30.139411°, -95.431755°
Wetland 7	PEM	0.48	Non-adjacent, non-jurisdictional	30.141658°, -95.429951°
Water Body 1	Impoundment from oil and gas activity	0.03	Pre-amble water, non-jurisdictional	30.142777°, -95.431942°
Water Body 2	Impoundment from oil and gas activity	0.01	Pre-amble water, non-jurisdictional	30.142849°, -95.431831°
Water Body 3	Impoundment from oil and gas activity	0.09	Pre-amble water, non-jurisdictional	30.142735°, -95.431582°
Total Wetland Waters: 2.35 acres				
Total Non-Wetland Waters: 0.13 acres

- f. 29 April 2025 Training: 2025 Continuous Surface Connection Guidance by the U.S. Department of Army, U.S. Army Corps of Engineers, and the U.S. Environmental Protection Agency

3. REVIEW AREA. The project area is approximately 52 acres located approximately 0.07 miles east of Hanna Road and 0.21 miles south of Blair Road in Spring, Montgomery County, Texas.

4. NEAREST TRADITIONAL NAVIGABLE WATER (TNW), INTERSTATE WATER, OR THE TERRITORIAL SEAS TO WHICH THE AQUATIC RESOURCE IS CONNECTED. Spring Creek is located approximately 1.7 aerial miles south of the project area. There is no connection between the aquatic resources in the project area and Spring Creek.

5. FLOWPATH FROM THE SUBJECT AQUATIC RESOURCES TO A TNW, INTERSTATE WATER, OR THE TERRITORIAL SEAS N/A

6. SECTION 10 JURISDICTIONAL WATERS⁵: Describe aquatic resources or other features within the review area determined to be jurisdictional in accordance with Section 10 of the Rivers and Harbors Act of 1899. Include the size of each aquatic resource or other feature within the review area and how it was determined to be jurisdictional in accordance with Section 10.⁶ N/A

⁵ 33 CFR 329.9(a) A waterbody which was navigable in its natural or improved state, or which was susceptible of reasonable improvement (as discussed in § 329.8(b) of this part) retains its character as "navigable in law" even though it is not presently used for commerce or is presently incapable of such use because of changed conditions or the presence of obstructions.

⁶ This MFR is not to be used to make a report of findings to support a determination that the water is a navigable water of the United States. The district must follow the procedures outlined in 33 CFR part 329.14 to make a determination that water is a navigable water of the United States subject to Section 10 of the RHA.

7. SECTION 404 JURISDICTIONAL WATERS: Describe the aquatic resources within the review area that were found to meet the definition of waters of the United States in accordance with the pre-2015 regulatory regime and consistent with the Supreme Court's decision in *Sackett*. List each aquatic resource separately, by name, consistent with the naming convention used in section 1, above. Include a rationale for each aquatic resource, supporting that the aquatic resource meets the relevant category of "waters of the United States" in the pre-2015 regulatory regime. The rationale should also include a written description of, or reference to a map in the administrative record that shows, the lateral limits of jurisdiction for each aquatic resource, including how that limit was determined, and incorporate relevant references used. Include the size of each aquatic resource in acres or linear feet and attach and reference related figures as needed.
 - a. TNWs (a)(1): N/A
 - b. Interstate Waters (a)(2): N/A
 - c. Other Waters (a)(3): N/A
 - d. Impoundments (a)(4): N/A
 - e. Tributaries (a)(5): N/A
 - f. The territorial seas (a)(6): N/A
 - g. Adjacent wetlands (a)(7): N/A

8. NON-JURISDICTIONAL AQUATIC RESOURCES AND FEATURES

- a. Describe aquatic resources and other features within the review area identified as "generally non-jurisdictional" in the preamble to the 1986 regulations (referred to as "preamble waters").⁷ Include size of the aquatic resource or feature within the review area and describe how it was determined to be non-jurisdictional under the CWA as a preamble water.

Water Bodies 1 and 2 are impoundments left over from previous oil and gas activity and are associated with a former well and mud pit in the same location. Waterbody 3 may have been used to store make-up water for the drilling mud. Therefore, Water Bodies 1-3 are preamble waters. The 1986 preamble to 33

⁷ 51 FR 41217, November 13, 1986.

CFR 320-330 regulations state that “for clarification it should be noted that we generally do not consider the following waters to be waters of the United States... (e) Waterfilled depressions created in dry land incidental to construction activity and pits excavated in dry land for the purpose of obtaining fill, sand, or gravel unless and until the construction operation is abandoned and the resulting body of water meets the definition of the waters of the United States (33 CFR 328.3 (a))” Therefore, Water Bodies 1-3, totaling 0.13 acres, are not waters of the United States subject to Section 404 of the Clean Water Act. Any discharge of dredge and/or fill material into Water Bodies 1-3 does not require a Department of the Army permit.

- b. Describe aquatic resources and features within the review area identified as “generally not jurisdictional” in the *Rapanos* guidance. Include size of the aquatic resource or feature within the review area and describe how it was determined to be non-jurisdictional under the CWA based on the criteria listed in the guidance.
N/A
- c. Describe aquatic resources and features identified within the review area as waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of CWA. Include the size of the waste treatment system within the review area and describe how it was determined to be a waste treatment system. N/A
- d. Describe aquatic resources and features within the review area determined to be prior converted cropland in accordance with the 1993 regulations (reference 2.b.). Include the size of the aquatic resource or feature within the review area and describe how it was determined to be prior converted cropland. N/A
- e. Describe aquatic resources (i.e. lakes and ponds) within the review area, which do not have a nexus to interstate or foreign commerce, and prior to the January 2001 Supreme Court decision in “*SWANCC*,” would have been jurisdictional based solely on the “Migratory Bird Rule.” Include the size of the aquatic resource or feature, and how it was determined to be an “isolated water” in accordance with *SWANCC*. N/A
- f. Describe aquatic resources and features within the review area that were determined to be non-jurisdictional because they do not meet one or more categories of waters of the United States under the pre-2015 regulatory regime consistent with the Supreme Court’s decision in *Sackett* (e.g., tributaries that are non-relatively permanent waters; non-tidal wetlands that do not have a continuous surface connection to a jurisdictional water).

Wetlands 2-6 do not meet the continuous surface connection standard for adjacent wetlands as it does not abut a relatively permanent water, a jurisdictional impoundment, or a traditional navigable water. Therefore, these wetlands are not waters of the United States subject to Section 404 of the Clean Water Act. Any discharge of dredge and/or fill material into these wetlands, totaling 1.57 acres, does not require a Department of the Army permit.

Wetland 1 does not meet the continuous surface connection standard for adjacent wetlands as it does not abut a relatively permanent water, a jurisdictional impoundment, or a traditional navigable water. The wetland does not extend to the culvert located east of Wetland 1. Any water moving from the wetland into the culvert would move by sheet flow. The culvert drains into Outfall 3, which is placed above the Ordinary High-Water Mark (OHWM) of the relatively permanent drainage channel located approximately 85 feet east of the property boundary. Therefore, Wetland 1 is not a water of the United States subject to Section 404 of the Clean Water Act. Any discharge of dredge and/or fill material into Wetland 1, totaling 0.3 acres, does not require a Department of the Army permit.

Wetland 7 drains directly into a culvert at the end of the wetland and the southern end of the property boundary. The culvert drains into Outfall 2 which is placed above the Ordinary High-Water Mark (OHWM) of the relatively permanent drainage channel located approximately 70 feet south of the culvert. According to guidance issued on 19 April 2025 on continuous surface connection by the Environmental Protection Agency and the US Army Corps of Engineers, since Outfall 2 is placed above the OHWM of the relatively permanent drainage ditch located south of the property boundary, Wetland 7 does not meet the continuous surface connection standard for adjacent wetlands. Therefore, Wetland 7 is not a water of the United States subject to Section 404 of the Clean Water Act. Any discharge of dredge and/or fill material into Wetland 7, totaling 0.48 acres, does not require a Department of the Army permit.

9. DATA SOURCES. List sources of data/information used in making determination. Include titles and dates of sources used and ensure that information referenced is available in the administrative record.
 - a. Aerial Photographs: *30 December 1985 to 15 March 2025*
