

Public Notice

**U.S. Army Corps
Of Engineers**

Galveston District

Permit Application No: SWG-1998-00131

Date Issued: 27 August 2020

Comments

Due: 14 September 2020

**U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT
AND
TEXAS COMMISSION ON ENVIRONMENTAL QUALITY**

PURPOSE OF PUBLIC NOTICE: To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

AUTHORITY: This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act.

APPLICANT: City of Corpus Christi
PO Box 9277
Corpus Christi, Texas 78469-9277
POC: Mr. Keith Selman
Telephone: 361-826-3220
Email: KeithSe@cctexas.com

AGENT: HDR Engineering, Inc.
555 N. Carancahua Street, Suite 1600
Corpus Christi, Texas 78401-0849
POC: Nicole Davis, PhD
Telephone: 361-696-3309
Email: nicole.davis@hdrinc.com

LOCATION: The project site is located in Corpus Christi Bay at North Beach between the Corpus Christi Ship Channel and Rincon Channel in Corpus Christi, Nueces County, Texas. The project can be located on the U.S.G.S. quadrangle map titled: Corpus Christi, Texas.

LATITUDE & LONGITUDE (NAD 83):
Latitude: 27.818086° North; Longitude: 97.389368° West

PROJECT DESCRIPTION: This request is for an extension of time for a permit issued 17 February 2015 and due to expire 31 December 2020. The applicant proposes to place up to 150,000 cubic yards (CY) of beach quality sand (compatible with existing beach) per event on an approximately 3,900-foot stretch of North Beach, a downtown recreational area on the western shoreline of Corpus Christi Bay. Of the total material to be placed, approximately 130,000 CY would be imported from an inland source and the remaining 20,000 CY would be excavated and redistributed from the northern (accretional) end of the existing beach. Material would be placed over a total of approximately 21.6 acres of existing beach within jurisdictional areas below the Annual High Tide Line; of the total placement area, 20.3 acres are below the Mean High Water Line. Sand would be excavated from a total of approximately 4.2 acres of jurisdictional areas below the Annual High Tide Line; of the area excavated, 4.0 acres will be from below the Mean High Water Line.

AVOIDANCE AND MINIMIZATION: The applicant has stated: "The project location is within a highly dispersive environment and any temporary elevation in turbidity will quickly dissipate. The applicant will follow criteria for avoidance and minimization outlined in the previously authorized permit issued on 17 February 2015 (SWG-1998-00131)."

MITIGATION: No mitigation is proposed for this project.

CURRENT SITE CONDITIONS: The project site consists of a regularly sculpted and cleaned beach consisting of beach-quality sand imported on a regular basis from offsite locations. The area surrounding the project site is a commercial and recreational area known as North Beach. It consists of restaurants, hotels, condominiums, the U.S.S. Lexington Museum, the Texas State Aquarium, and residential housing. It borders Corpus Christi Bay where the waters are relatively clear and support large beds of shoal grass, turtle grass, and associated flora and fauna.

NOTES: This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The applicant's plans are enclosed in 6 sheets.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

Our evaluation will also follow the guidelines published by the U.S. Environmental Protection Agency pursuant to Section 404 (b)(1) of the Clean Water Act (CWA).

OTHER AGENCY AUTHORIZATIONS:

Consistency with the State of Texas Coastal Management Plan is required. The applicant has stated that the proposed activity complies with Texas' approved Coastal Management Program goals and policies and will be conducted in a manner consistent with said program.

This project would result in a direct impact of greater than three acres of waters of the state or 1500 linear feet of streams (or a combination of the two is above the threshold), and as such would not fulfill Tier I criteria for the project. Therefore, Texas Commission on Environmental Quality (TCEQ) certification is required. Concurrent with Corps processing of this application, the TCEQ is reviewing this application under Section 401 of the CWA and in accordance with Title 30, Texas Administrative Code Section 279.1-13 to determine if the work would comply with State water quality standards. By virtue of an agreement between the Corps and the TCEQ, this public notice is also issued for the purpose of advising all known interested persons that there is pending before the TCEQ a decision on water quality certification under such act. Any comments concerning this application may be submitted to the Texas Commission on Environmental Quality, 401 Coordinator, MSC-150, P.O. Box 13087, Austin, Texas 78711-3087. The public comment period extends 30 days from the date of publication of this notice. A copy of the public notice with a description of work is made available for review in the TCEQ's Austin office. The complete application may be reviewed in the Corps office listed in this public notice. The TCEQ may conduct a public meeting to consider all comments concerning water quality if requested in writing. A request for a public meeting must contain the following information: the name, mailing address, application number, or other recognizable reference to the application; a brief description of the interest of the requester, or of persons represented by the requester; and a brief description of how the application, if granted, would adversely affect such interest.

NATIONAL REGISTER OF HISTORIC PLACES: The staff archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The permit area has been so extensively impacted by placement of dredged material and erosion that there is no potential for historic properties to exist within the permit area. Therefore, the proposed project has no potential to effect historic properties.

THREATENED AND ENDANGERED SPECIES: Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed work.

ESSENTIAL FISH HABITAT: This notice initiates the Essential Fish Habitat consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Our initial determination is that the proposed action would not have a substantial adverse impact on Essential Fish Habitat or federally managed fisheries in the Gulf of Mexico.

Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

PUBLIC INTEREST REVIEW FACTORS: This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps of Engineers, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

SOLICITATION OF COMMENTS: The Corps of Engineers is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps of Engineers may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

PUBLIC HEARING: The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

CLOSE OF COMMENT PERIOD: All comments pertaining to this Public Notice must reach this office on or before **14 September 2020**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-1998-00131**, and should be submitted to:
