

Public Notice

U.S. Army Corps Of Engineers	Permit Application No: _____	SWG-2018-00613
	Date Issued: _____	25 July 2019
	Comments _____	
Galveston District	Due: _____	26 August 2019

**U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT
AND
TEXAS COMMISSION ON ENVIRONMENTAL QUALITY**

PURPOSE OF PUBLIC NOTICE: To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

AUTHORITY: This application will be reviewed pursuant to Section 404 of the Clean Water Act (CWA).

APPLICANT: INEOS Styrolution America, LLC
12222 Port Road
Pasadena, Texas 77507-1800
POC: Robert Osterhold
Telephone: 832-205-4766
Email: rob.osterhold@styrolution.com

AGENT: ATC Group Services, LLC
5750 Johnston Street, Suite 400
Lafayette, Louisiana 70503-5334
POC: April Dykes
Telephone: 225-726-5247
Email: april.dykes@atcgs.com

LOCATION: The project site is located in wetlands adjacent to Galveston Bay, located at 12222 Port Road, in Pasadena, Harris County, Texas. The project can be located on the U.S.G.S. quadrangle map titled: League City, Texas.

LATITUDE & LONGITUDE (NAD 83):

Latitude: 29.595372° North; **Longitude:** 095.015377° West

PROJECT DESCRIPTION: The applicant proposes to discharge dredged or fill material into 1.327 acres of wetlands and 0.037 acre of open water for the purpose of constructing an Acrylonitrile Styrene Acrylate (ASA) polymer unit and associated structures including, but not limited to, a maintenance building, warehouse, laboratory, roadways, railway, and railcar loading area.

AVOIDANCE AND MINIMIZATION: The applicant has stated that they have avoided and minimized the environmental impacts, to the extent practicable by decreasing the proposed amount of wetland fill proposed on this property from 1.58 acres to 0.45-acre total wetland impact as well as decreasing the area of open water impacts proposed from 0.35 acre to 0.023 acre.

MITIGATION: The applicant proposed to mitigate for the proposed impacts by implementing a permittee responsible mitigation (PRM) proposal. The goal of the PRM proposal is to restore/rehabilitate 2.3 acre of PEM/PSS wetlands located off site but within the West Galveston Bay Watershed.

CURRENT SITE CONDITIONS: The project site is currently a previously developed 52-acre tract of land surrounded by industrial development to the north, Pine Gully to the south, and undeveloped tracts to the east and west. This project site contains 11.97 acres of wetlands and 0.35 acre of open water. The northern portion of the project site contains 0.47 acre of wetlands. The southern portion of the tract contains 11.5 acres of wetlands and the 0.35-acre open water area.

NOTES: This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The wetland delineation has been completed and was verified by the Corps on 9 January 2019. The applicant's plans are enclosed in 19 sheets.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

Our evaluation will also follow the guidelines published by the U.S. Environmental Protection Agency pursuant to Section 404 (b)(1) of the CWA.

OTHER AGENCY AUTHORIZATIONS: Consistency with the State of Texas Coastal Management Plan is required. The applicant has stated that the proposed activity complies with Texas' approved Coastal Management Program goals and policies and will be conducted in a manner consistent with said program.

This project incorporates the requirements necessary to comply with the Texas Commission on Environmental Quality's (TCEQ) Tier I project criteria. Tier I projects are those which result in a direct impact of three acres or less of waters of the state or 1,500 linear feet of streams (or a combination of the two is below the threshold) for which the applicant has incorporated best management practices and other provisions designed to safeguard water quality. The Corps has received a completed checklist and signed statement fulfilling Tier I criteria for the project. Accordingly, a request for 401 certification is not necessary and there will be no additional TCEQ review.

NATIONAL REGISTER OF HISTORIC PLACES: The Corps' Staff Archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The proposed construction is in an area that has been so extensively impacted by previous development that there is no potential for historic properties to exist. Therefore, the proposed project has no potential to effect historic properties.

THREATENED AND ENDANGERED SPECIES: Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed work.

ESSENTIAL FISH HABITAT: This notice initiates the Essential Fish Habitat consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Our initial determination is that the proposed action would not have a substantial adverse impact on Essential Fish Habitat or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

PUBLIC INTEREST REVIEW FACTORS: This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

SOLICITATION OF COMMENTS: The Corps is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an EIS pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

PUBLIC HEARING: The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

CLOSE OF COMMENT PERIOD: All comments pertaining to this public notice must reach this office on or before **26 August 2019**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-2018-00613**, and should be submitted to:
