U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT

PURPOSE OF PUBLIC NOTICE: To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

AUTHORITY: This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899.

APPLICANT: Matagorda Offshore, L.L.C. / Genesis Energy, LP
919 Milam Street, Suite 2100
Houston, Texas 77002
Telephone: 713-280-3093
POC: Jessica Stone

LOCATION: The project site is located in the Gulf of Mexico at Matagorda Island Area Block 558-L and 568, to Outer Continental Shelf (OCS) Tract 589, 590, and 604, Offshore, Texas.

LATITUDE & LONGITUDE (NAD 83):

Northern Terminus Latitude: 28.268286 North;
Southern Terminus Latitude: 28.143834 North;

Longitude: -96.2792002 West
Longitude: -96.220022 West

PROJECT DESCRIPTION: The applicant proposes to modify an existing permit to allow decommission-in-place of a 9.40-mile-long, 16-inch-diameter steel natural gas service pipeline, coated with 2.5 inches of concrete, and buried with 3 to 5 feet of cover over the top of the pipeline. Of the total 9.40 miles, 1.41 miles are located in state waters. This pipeline was originally authorized under Department of the Army Permit 16510(01)/89 and put in service in 1989. The pipeline is located in the Gulf of Mexico, Matagorda Island Area Blocks 604, 589, 590, 565, and 558, offshore Texas with water depth ranges of -72 feet to -89 feet. The Bureau of Safety and Environmental Enforcement (BSEE) right-of-way number OCS-G11134, granted the pipeline decommissioning-in-place by letter dated 23 February 2011. In June 2011, full pipeline decommissioning-in-place was completed in accordance with the BSEE 30 CFR 250.1750 pipeline decommissioning requirements, which included: 1. disconnection from previously serviced platforms, 2. flushing by pigging, and filling with seawater, 3. plugged each end of the pipeline; and 4. confirmed depth of cover at the pipeline ends, and covered endpoints with protective concrete mats.

AVOIDANCE AND MINIMIZATION: The applicant has stated that they have avoided and minimized the environmental impacts by decommissioning the cleaned pipeline in place, rather than removing it and causing disruption of the bottom and Gulf of Mexico water column.

MITIGATION: The applicant propose no mitigation.

CURRENT SITE CONDITIONS: On the seafloor of the Gulf of Mexico with varying water depths of -79 feet to -89 feet.

NOTES: This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The applicant's plans are enclosed in 6 sheets.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

OTHER AGENCY AUTHORIZATIONS:

Consistency with the State of Texas Coastal Management Plan is required. The applicant has stated that the proposed activity complies with Texas' approved Coastal Management Program goals and policies and will be conducted in a manner consistent with said program.

No water quality certification is required.

NATIONAL REGISTER OF HISTORIC PLACES: The staff archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The proposed project, decommissioning of an existing pipeline, is of such limited nature and scope that it has no potential to effect historic properties, even if present within the project area.

THREATENED AND ENDANGERED SPECIES: Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed work.

ESSENTIAL FISH HABITAT: This notice initiates the Essential Fish Habitat consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Our initial determination is that the proposed action would not have a substantial adverse impact on Essential Fish Habitat or federally-managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

PUBLIC INTEREST REVIEW FACTORS: This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

SOLICITATION OF COMMENTS: The Corps is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an EIS pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

PUBLIC HEARING: The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

CLOSE OF COMMENT PERIOD: All comments pertaining to this public notice must reach this office on or before **9 January 2017**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-2012-00350**, and should be submitted to:
