Of Engineers**

Galveston District

Permit Application No: _____ SWG-1997-01825

Date Issued: _____ 9 May 2017

Comments

Due: _____ 9 June 2017

U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT

PURPOSE OF PUBLIC NOTICE: To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

AUTHORITY: This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899.

APPLICANT:

Mr. Tambrey Naron
Fairways Offshore Exploration, Inc.
13430 Northwest Freeway, Suite 900
Houston, Texas 77040
Telephone: 832-255-1502
tnaron@fairwaysresources.com

AGENT:

Ms. Kim Sayre
J. Connor Consulting, Inc.
19219 Katy Freeway, Suite 200
Houston, Texas 77094
Telephone: 281-578-3388
kim.sayer@gccteam.com

LOCATION: The project site is located in the Galveston Shipping Fairway and Anchorage Area, in Blocks 154 and 178, outer continental shelf Federal Waters, Gulf of Mexico, Offshore, Texas. The project can be located on the U.S.G.S. quadrangle map entitled: HIGH ISLAND, Texas.

High Island 154 - LATITUDE & LONGITUDE (NAD 83):

Latitude: 29.228732° North;

Longitude: -94.464391° West

High Island 178 - LATITUDE & LONGITUDE (NAD 83):

Latitude: 29.21135° North;

Longitude: -94.438203° West

PROJECT DESCRIPTION: The applicant proposes to decommission an 8-inch to 10-inch gas/condensate pipeline originating at High Island Block 154 Platform JA and terminating at 24-inch SSTI, High Island Block 178. In July 2014, partial pipeline abandonment-in-place was completed in accordance with the regulations contained in 30 CFR 250.1751. The pipeline was disconnected at the High Island Block 178 SSTI end, flushed and filled with inhibited seawater and plumber plug installed. This end was buried a minimum of 3 feet below natural bottom. The riser will be removed at time of structure removal and end buried a minimum of 3 feet below natural bottom. The pipeline was originally buried a minimum of 10 feet below natural bottom in the shipping fairway and 16.5 feet below natural bottom in the anchorage area. The water depths range from approximately 50 feet to 56 feet below mean higher high water.

In accordance with the Bureau of Safety and Environmental Enforcement (BSEE) 30 CFR 250.1750 pipeline decommissioning requirements, the applicant proposes to: 1. Disconnect from previously serviced platform and subsea tie-in connection, 2. Flush by pigging, and filling with seawater to equalize the line pressure, 3. Plug each end of the pipeline; and 4. Confirm depth of cover at the pipeline ends, and cover endpoints with protective concrete mats. The BSEE project number is Segment 11626.

AVOIDANCE AND MINIMIZATION: The applicant has stated that they have avoided and minimized the environmental impacts by decommissioning the cleaned pipeline in place, rather than removing it and causing disruption of the bottom and Gulf of Mexico water column.

MITIGATION: No compensatory mitigation is proposed.

CURRENT SITE CONDITIONS: The existing pipeline is located on the floor of the Gulf of Mexico, at varying water depths of approximately 50 feet to 56 feet.

NOTES: This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The applicant's plans are enclosed in 3 sheets.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

OTHER AGENCY AUTHORIZATIONS: The project site is not located within the Texas Coastal Zone and therefore, does not require certification from the Texas Coastal Management Program.

No water quality certification is required.

NATIONAL REGISTER OF HISTORIC PLACES: The staff archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The proposed project, decommissioning of an existing pipeline, is of such limited nature and scope that it has no potential to effect historic properties, even if present within the project area.

THREATENED AND ENDANGERED SPECIES: Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed decommissioning. Removal of the pipeline may require further review by the Corps to determine the effects on threatened and/or endangered species.

ESSENTIAL FISH HABITAT: This notice initiates the Essential Fish Habitat consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Our initial determination is that the proposed action would not have a substantial adverse impact on Essential Fish Habitat or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

PUBLIC INTEREST REVIEW FACTORS: This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

SOLICITATION OF COMMENTS: The Corps is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an EIS pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

PUBLIC HEARING: The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

CLOSE OF COMMENT PERIOD: All comments pertaining to this public notice must reach this office on or before **9 June 2017**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-1997-01825**, and should be submitted to:
