

Public Notice

U.S. Army Corps Of Engineers	Permit Application No: _____	SWG-1998-00655
	Date Issued: _____	12 May 2020
	Comments _____	
Galveston District	Due: _____	28 May 2020

U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT

PURPOSE OF PUBLIC NOTICE: To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

AUTHORITY: This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899.

APPLICANT: Alfred Krebs
2311 Vine Creek Drive
Humble, Texas 77345-1705
Telephone: 281-900-1583
Email: ALJKREBS@hotmail.com

LOCATION: The project site is located in Lake Livingston, at 272 Old Post Road South, in Livingston, Polk County, Texas. The project can be located on the U.S.G.S. quadrangle map titled: Blanchard, Texas.

LATITUDE & LONGITUDE (NAD 83):

Latitude: 30.707808° North; **Longitude:** 095.064186° West

PROJECT DESCRIPTION: The applicant proposes to modify a previously permitted structure by adding an 8-foot-wide by 10-foot-long extension to the existing terminal "L" – head structure.

AVOIDANCE AND MINIMIZATION: The applicant has avoided and minimized the environmental impacts by avoiding all impacts to special aquatic sites.

MITIGATION: This project is a Section 10 only project, no discharge of dredged or fill material is proposed for this project. No loss of waters of the United States will occur as a result of this project. Therefore no compensatory mitigation is proposed for this project.

CURRENT SITE CONDITIONS: The project site is located within a man-made impoundment of the Trinity River known as Lake Livingston. The project site for this project lies in a primarily residential area along the shoreline. The shoreline at this location has been stabilized. The lake as a whole is popular for recreation, but is also used as water supply for industrial, agricultural, and municipal purposes.

BACKGROUND: Department of the Army (DA) Permit 20157 was issued 22 December 1994, and authorized the construction of a private pier and covered boat slip. The authorized structure included a 4-foot-wide by 50-foot-long walkway and an 8-foot-wide by 33-foot-long dock. Extending from the dock is a 1-foot-wide by 24-foot-long finger pier, an 8-foot-wide by 24-foot-long center pier, and a 4-foot-wide by 24-foot-long pier. These piers bound two, 10-foot-wide by 24-foot-long open boat slips. On the west side of the structure an 8-foot-wide by 10-foot-long "L"-head terminal structure was also authorized. This permit was amended. DA Permit 20157(01) was issued 4 June 1998 and authorized the installation of three pilings for the construction of a 10-foot-wide by 16-foot-long covered area for personal watercraft.

NOTES: This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The applicant's plans are enclosed in 5 sheets.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

OTHER AGENCY AUTHORIZATIONS: The project site is not located within the Texas Coastal Zone and therefore, does not require certification from the Texas Coastal Management Program.

No water quality certification is required.

NATIONAL REGISTER OF HISTORIC PLACES: The staff archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The proposed project is of such limited nature and scope that it has no potential to effect historic properties, even if present within the project area.

THREATENED AND ENDANGERED SPECIES: Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed work.

PUBLIC INTEREST REVIEW FACTORS: This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

SOLICITATION OF COMMENTS: The Corps is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an EIS pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

PUBLIC HEARING: The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

CLOSE OF COMMENT PERIOD: All comments pertaining to this public notice must reach this office on or before **28 May 2020**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-1998-00655**, and should be submitted to:
