## U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT

**PURPOSE OF PUBLIC NOTICE:** To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

**AUTHORITY:** This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899.

**APPLICANT:** TRANSCONTINENTAL GAS PIPE LINE COMPANY, LLC.  
2800 Post Oak Boulevard  
Houston, Texas 77056-6100  
POC: Cathy Thornton  
Telephone: 713-215-4235  
Email: cathy.thornton@williams.com

**AGENT:** N/A

**LOCATION:** The proposed project is located in the Gulf of Mexico, approximately 43 miles east of Matagorda Island, Offshore, Texas. The project site can be located on the B.O.E.M. OPD/Leasing Map titled: TX5B Brazos Area, South addition from OCS Block BA A 133 through to OCS Block BA A 76.

**LATITUDE & LONGITUDE (NAD 83):**

**Latitude:** 27.854664 North; **Longitude:** 96.036489 West

**PROJECT DESCRIPTION:** The applicant proposes to decommission-in-place the entire 10.7-mile length of pipeline known as segment 20125. The applicant has stated that the proposed project would not result in either temporary or permanent impacts to the sea floor. The applicant states that full removal of this pipeline segment would cause significant disturbance and ecological damage to the seafloor and would introduce an unnecessary safety risk to personnel involved in the removal operations.

In accordance with the Bureau of Safety and Environmental Enforcement 30 CFR 250.1750, pipeline decommissioning requirements, the applicant proposes to perform the following: 1) Disconnect from the previous service platform and subsea tie-in connection; 2) Flush the line by pigging and fill with seawater to equalize line pressure; 3) Plug each end of the pipeline; and 4) Cover each end with a protective concrete mat and confirm the depth of cover.

The proposed timeline for the decommissioning operations are expected to last approximately 7 days with equipment and personnel in the water for approximately 2 days at each end to disconnect from the two platforms.

A permit modification was previously approved by the Corps to decommission-in-place this segment on 20 July 2017 with a permit expiration on 31 December 2022, however the work was not initiated.

**AVOIDANCE AND MINIMIZATION:** The applicant has stated that they would avoid and minimize environmental impacts by decommissioning the clean pipeline in place, rather than removing it and causing disruption within the Gulf of Mexico water column and along the seafloor.

**MITIGATION:** The applicant has not proposed any form of mitigation.

**CURRENT SITE CONDITIONS:** The pipeline segment is currently out-of-service and located beneath the Gulf of Mexico seafloor ranging from 1.6-10.5 feet below the mudline at water depths ranging between -168 feet to -203 feet.

**NOTES:** This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The applicant's plans are enclosed in 3 sheets.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

**OTHER AGENCY AUTHORIZATIONS:**

The project site is not located within the Texas Coastal Zone and therefore, does not require certification from the Texas Coastal Management Program.

No water quality certification is required.

**NATIONAL REGISTER OF HISTORIC PLACES:** The staff archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The proposed project is of such limited nature and scope that it has no potential to affect historic properties, even if present within the project area.

**THREATENED AND ENDANGERED SPECIES:** Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed work.

**ESSENTIAL FISH HABITAT:** This notice initiates the Essential Fish Habitat consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Our initial determination is that the proposed action would not have a substantial adverse impact on Essential Fish Habitat or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

**PUBLIC INTEREST REVIEW FACTORS:** This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

**SOLICITATION OF COMMENTS:** The Corps is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an EIS pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

**PUBLIC HEARING:** The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

**CLOSE OF COMMENT PERIOD:** All comments pertaining to this public notice must reach this office on or before **2 June 2023**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-2016-01075**, and should be submitted to:
