## U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT

**PURPOSE OF PUBLIC NOTICE:** To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

**AUTHORITY:** This application will be reviewed pursuant to Section 10 of the Rivers and Harbors Act of 1899.

**APPLICANT:** Transcontinental Gas Pipeline Company, LLC  
2800 Post Oak Boulevard  
Houston, Texas 77056  
POC: Mr. Chad Alessi  
Email: cathy.thornton@williams.com

**AGENT:** T Baker Smith, LLC  
107 Global Circle  
Lafayette, Louisiana 70503  
POC: Mr. Jude LeDoux  
Telephone: 337-735-2800  
Email: jude.ledoux@tbsmith.com

**LOCATION:** The project site is located in the Gulf of Mexico, High Island Area, South Addition, in Federal Blocks: A-531, A-536, A-537, A-538, and A-555, central to a point approximately 115 miles south-southwest from Sabine, in Jefferson County, Texas.

**LATITUDE & LONGITUDE (NAD 83):**

**SEG # 5451**, 20-inch pipe, 8.73 miles long

**Point of Beginning (POB):** 28.084636 North; -94.443789 West

**Point of End (POE):** 27.997108 North; -94.343008 West

**SEG# 5452**, 12-inch pipe, 2.30 miles long

**POB:** 28.049031 North; -94.37844 West

**POE:** 28.082058 North; -94.439558 West

**PROJECT DESCRIPTION:** The applicant proposes to decommission-in-place 8.73 miles of existing 20-inch natural gas pipeline, segment number 5451 and 2.30 miles of existing 12-inch natural gas pipeline, segment number 5452. These pipelines are currently in areas expressing water depths of approximately 200 feet and greater. They were previously authorized via Department of the Army Permit 13732. Approximately 0.26 acre (422.02 cubic yards) of continental shelf will be temporarily impacted so that the pipeline can be cut, flushed, and capped. The applicant states that due to the depth of the pipeline, removal would cause significant disturbance and ecological damage to the sea bottom and removal of the line introduces unnecessary safety risks to the dive and removal crew.

In accordance with the Bureau of Safety and Environmental Enforcement 30 CFR 250.1750 pipeline decommissioning requirements, the applicant proposes to:

1. Disconnect from previously serviced platform and subsea tie-in connection;
2. Flush by pigging, and filling with seawater to equalize the line pressure;
3. Plug each end of the pipeline; and
4. Confirm depth of cover at the pipeline ends, and cover endpoints with protective concrete mats.

**AVOIDANCE AND MINIMIZATION:** The applicant has stated that they have avoided and minimized environmental impacts by decommissioning the cleaned pipelines in place, rather than removing them and causing disruption of the seafloor and Gulf of Mexico water column. The pipelines are proposed to be cut, flushed, capped, and filled with native seawater. This method should reduce turbidity and minimize overall disturbance in the immediate area. No permanent impacts to water bottoms are proposed or anticipated within the scope of this activity.

**MITIGATION:** The applicant has not proposed any mitigation.

**CURRENT SITE CONDITIONS:** The current project site is the sea floor/subsea floor of the Gulf of Mexico in areas expressing water depths of approximately 200 feet and greater. The current site condition is typical sea floor setting, made up of rocks, minerals, sediments, and sand.

**NOTES:** This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The applicant's plans are enclosed in 8 sheets.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

Our evaluation will also follow the guidelines published by the U.S. Environmental Protection Agency pursuant to Section 404 (b)(1) of the Clean Water Act.

**OTHER AGENCY AUTHORIZATIONS:** The project site is not located within the Texas Coastal Zone and therefore, does not require certification from the Texas Coastal Management Program.

No water quality certification is required.

**NATIONAL REGISTER OF HISTORIC PLACES:** The staff archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The proposed project is of such limited nature and scope that it has no potential to effect historic properties, even if present within the project area.

**THREATENED AND ENDANGERED SPECIES:** Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed work.

**ESSENTIAL FISH HABITAT:** This notice initiates the Essential Fish Habitat consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Our initial determination is that the proposed action would not have a substantial adverse impact on Essential Fish Habitat or federally managed fisheries in the Gulf of Mexico. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service.

**PUBLIC INTEREST REVIEW FACTORS:** This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

**SOLICITATION OF COMMENTS:** The Corps is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an EIS pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

**PUBLIC HEARING:** The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

**CLOSE OF COMMENT PERIOD:** All comments pertaining to this public notice must reach this office on or before **24 June 2019**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-2018-00253**, and should be submitted to:
