Of Engineers**

Galveston District

Permit Application No: _____

Date Issued: _____

Comments _____

Due: _____

SWG-2015-00772

30 November 2017

2 January 2018

**U.S. ARMY CORPS OF ENGINEERS, GALVESTON DISTRICT
AND
TEXAS COMMISSION ON ENVIRONMENTAL QUALITY**

PURPOSE OF PUBLIC NOTICE: To inform you of a proposal for work in which you might be interested. It is also to solicit your comments and information to better enable us to make a reasonable decision on factors affecting the public interest. The U.S. Army Corps of Engineers (Corps) is not the entity proposing or performing the proposed work, nor has the Corps taken a position, in favor or against the proposed work.

AUTHORITY: This application will be reviewed pursuant to Section 404 of the Clean Water Act (CWA).

APPLICANT: NASH FM 529, LLC
10940 West Sam Houston Parkway, Suite 300
Houston, Texas 77064
POC: Mr. Alan Bauer

AGENT: Berg-Oliver Associates, Inc.
14701 Saint Mary's Lane, Suite 400
Houston, Texas 77079
Telephone: 281.589.0898
POC: Ms. Natalie Hall

LOCATION: The project site is located northeast of the intersection of Beckendorff Road and Peek Road, in Katy, Harris County, Texas. The project can be located on the U.S.G.S. quadrangle map titled: Katy, Texas.

LATITUDE & LONGITUDE (NAD 83):

Latitude: 29.865069 North;

Longitude: -95.772304 West

PROJECT DESCRIPTION: The applicant proposes to discharge fill material into 1.67 acres of wetlands for commercial and residential development. The applicant's proposed plans are attached on 4 sheets.

AVOIDANCE AND MINIMIZATION: The applicant has given the following statement: "Due to the location of the property and existing easements running north to south adjacent to the property, the entire 92.40-acre tract will need to be utilized for development. Additionally, the nature of the proposed project will require the entire land to be utilized for development, otherwise the site is not economically feasible for development. Although the Applicant reviewed options for avoidance and minimization, unfortunately the most feasible option was development of the entire 92.40 acres".

MITIGATION: The applicant has proposed compensatory mitigation in the form of permittee responsible mitigation.

CURRENT SITE CONDITIONS: The project site is currently an undeveloped tract of land surrounded by a county road and undeveloped land to the north, undeveloped land to the east, a county road and undeveloped land to the west, and a county road and residential development to the south. The wetland vegetation consists of swamp smartweed (*Persicaria hydropiperoides*) gaping panicum (*Stenchisma hians*), and sand spike-rush (*Eleocharis montevidensis*). The subject wetlands are adjacent to Bear Creek.

NOTES: This public notice is being issued based on information furnished by the applicant. This project information has not been verified by the Corps. The wetland delineation has been completed and was verified by the Corps on 16 March 2016.

A preliminary review of this application indicates that an Environmental Impact Statement (EIS) is not required. Since permit assessment is a continuing process, this preliminary determination of EIS requirement will be changed if data or information brought forth in the coordination process is of a significant nature.

Our evaluation will also follow the guidelines published by the U.S. Environmental Protection Agency pursuant to Section 404 (b)(1) of the CWA.

OTHER AGENCY AUTHORIZATIONS:

This project incorporates the requirements necessary to comply with the Texas Commission on Environmental Quality's (TCEQ) Tier I project criteria. Tier I projects are those which result in a direct impact of three acres or less of waters of the state or 1,500 linear feet of streams (or a combination of the two is below the threshold) for which the applicant has incorporated best management practices and other provisions designed to safeguard water quality. The Corps has received a completed checklist and signed statement fulfilling Tier I criteria for the project. Accordingly, a request for 401 certification is not necessary and there will be no additional TCEQ review.

NATIONAL REGISTER OF HISTORIC PLACES: The staff archaeologist has reviewed the latest published version of the National Register of Historic Places, lists of properties determined eligible, and other sources of information. The following is current knowledge of the presence or absence of historic properties and the effects of the undertaking upon these properties:

The permit area is likely to yield resources eligible for inclusion in the National Register of Historic Places. An investigation for the presence of potentially eligible historic properties is justified.

THREATENED AND ENDANGERED SPECIES: Preliminary indications are that no known threatened and/or endangered species or their critical habitat will be affected by the proposed work.

PUBLIC INTEREST REVIEW FACTORS: This application will be reviewed in accordance with 33 CFR 320-332, the Regulatory Programs of the Corps, and other pertinent laws, regulations and executive orders. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits, which reasonably may be expected to accrue from the proposal, must be balanced against its reasonably foreseeable detriments. All factors, which may be relevant to the proposal, will be considered: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and, in general, the needs and welfare of the people.

SOLICITATION OF COMMENTS: The Corps is soliciting comments from the public, Federal, State, and local agencies and officials, Indian tribes, and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Impact Assessment and/or an EIS pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

This public notice is being distributed to all known interested persons in order to assist in developing facts upon which a decision by the Corps may be based. For accuracy and completeness of the record, all data in support of or in opposition to the proposed work should be submitted in writing setting forth sufficient detail to furnish a clear understanding of the reasons for support or opposition.

PUBLIC HEARING: The purpose of a public hearing is to solicit additional information to assist in the evaluation of the proposed project. Prior to the close of the comment period, any person may make a written request for a public hearing, setting forth the particular reasons for the request. The District Engineer will determine if the reasons identified for holding a public hearing are sufficient to warrant that a public hearing be held. If a public hearing is warranted, all known interested persons will be notified of the time, date, and location.

CLOSE OF COMMENT PERIOD: All comments pertaining to this public notice must reach this office on or before **2 January 2018**. Extensions of the comment period may be granted for valid reasons provided a written request is received by the limiting date. **If no comments are received by that date, it will be considered that there are no objections.** Comments and requests for additional information should reference our file number, **SWG-2015-00772**, and should be submitted to:
