PROPOSED PIPELINE & ACCESS ROUTE
 UNDER GP 24152,
 CORPUS CHRISTI BAY, NUECES COUNTY, TEXAS

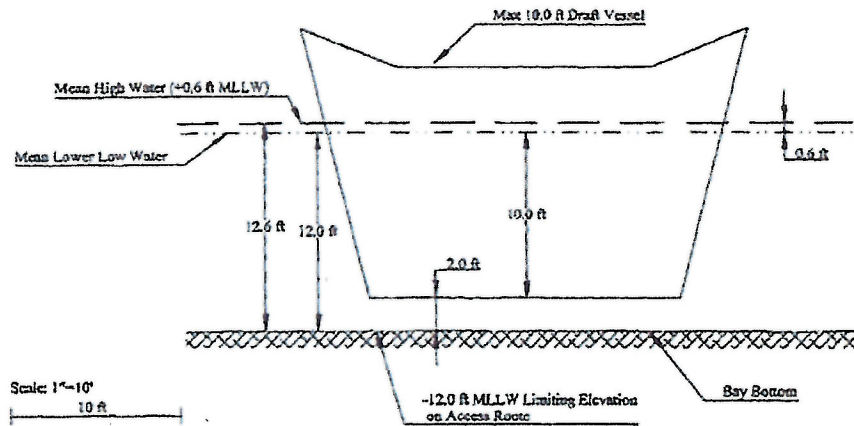

Cabot Oil & Gas Corp.
 840 Gessner Rd., #1200
 Houston, TX 77024

Project Consulting Services, Inc.
 1800 West Loop South, Ste. 900
 Houston, Texas 77027

PERMITTED PLANS June 10, 2008

Page 3 of 5
 SWG-2008-00692

Typical Section View Showing Vessel & Drilling Rig Draft Clearance of Access Route

Note Regarding Vessel Clearance: The lowest tide recorded in Corpus Christi Bay from 2001 to 2007 is -1.25 ft MLLW. Should this tide level occur again, the clearance between the vessel bottom and the bay bottom for a 10.0 ft draft vessel traversing the proposed access route would be 0.75 ft.

Notes:

- Elevations are in feet Mean Lower Low Water (MLLW) based on bathymetric surveys provided by Naismith Marine Services.
- Maximum rig, vessel and tug boat draft will be 10.0 ft. Limiting elevation on access route is -12.0 ft MLLW. This will provide a minimum of 2.0 ft of clearance between the vessels and bay bottom at MLLW.
- Prepared by: Belair Environmental, Inc., 2-5-08 (BSG).
- Revised 6-13-08 (MTS).
- For planning and permitting purposes only, not for construction.
