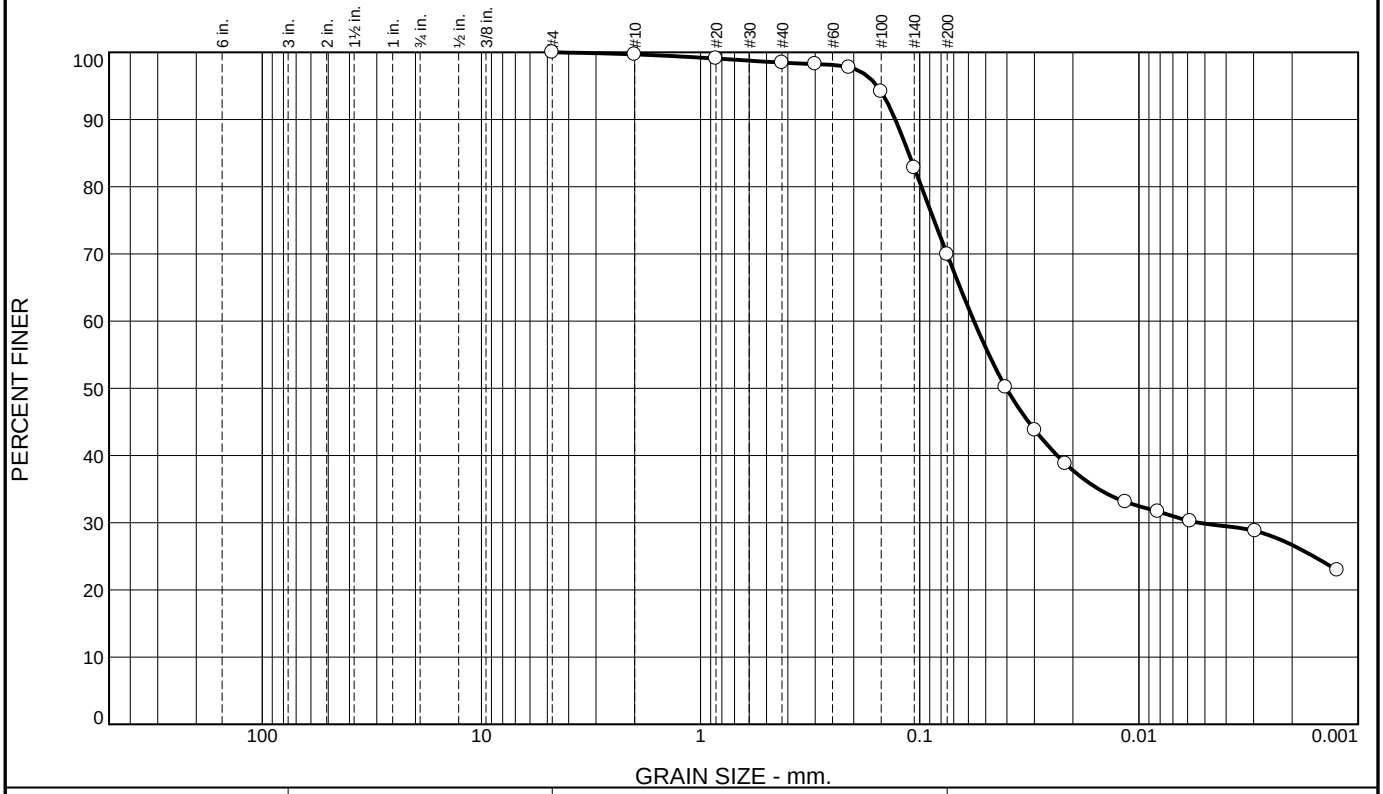
Ms. Monica Martin

Re: North Water District Laboratory Services, Inc. (NWDLS)
NWDLS Geosciences Lab Testing – Task Order #01
Project #22A3944

The Taylor Engineering Coastal & Marine Geosciences Laboratory is pleased to submit the following sediment data for NWDLS project #22A3944. Taylor Engineering received 13 samples for analysis in Jacksonville, Florida on March 9th, 2022. Laboratory testing included sieve and hydrometer analysis according to ASTM D-422. Attached to this letter are the individual test results for each sample.



If any additional information is needed or if you have any questions, please contact me at (904) 731-7040 or wwarren@taylorengineering.com.

Sincerely,

William Warren, P.G.
Project Geologist
Coastal & Marine Geosciences Lab Manager

APPENDIX D

CHEMICAL QUALITY ASSURANCE REPORT

EPA Region 6
Data Review and Validation Requirements
Dredged Material Disposal Evaluation

Project: PCCA CDP Inner Harbor Section 103

Project Initiation Date: November 16, 2021

Project Sampling Dates:

Begin: February 11, 2022

End: March 3, 2022

Final Report Date:

Final Review Date: October 5, 2022

Data acceptable (Y/N):

If data unacceptable summarize issues to be addressed:

I certify the review in this document conforms to all applicable regulatory and project-specific requirements.

QA Officer

Laboratory Information

Use one sheet for each laboratory that will perform analytical work for this project.

Laboratory Name/Identification: North Water District Laboratory Services

Is lab NELAC certified? Yes/No If Yes, please supply certification number TCEQ T104704238-21-33

Can lab meet the QC requirements below as specified in the SAP/QAPP?

Yes/No	
Yes	Analytical requirement
Yes	Instrumentation
Yes	MDL's meet project TDL requirements
Yes	Precision and accuracy
Yes	Required turnaround time

Note below any requirements the laboratory is unable to meet.

List of Acronyms

CCV	continuing calibration verification
IC	initial calibration
ICB	initial calibration blank
ICV	initial calibration verification
IS	internal standard
LCS/DLCS	laboratory control sample/duplicate laboratory control sample
LDR	linear dynamic range
LFB	laboratory fortified blank
MB	method blank
MDL	method detection limit
MN	*Macoma nasuta*
MS/MSD	matrix spike/matrix spike duplicate
NV	*Neanthes virens*
RL	reporting limit
SAP/QAPP	Sampling and Analysis Plan/Quality Assurance Project Plan
RIA	EPA Region 6 - Regional Implementation Manual
SRM	standard reference material

Sample Custody

Was all required information on the chain-of-custody form:

(Yes/No)	
Yes	Did chain of custody forms accompany samples to subcontract lab?
Yes	Is the project identification on the chain of custody?
No	Are the analyses requested printed on the sample containers?
Yes	Were all samples correctly identified?
Yes	Were the analyses correctly identified on the chain of custody or an attached document listed on the chain of custody?
Yes	Were sample dates and times listed on the chain of custody?
Yes	Were the chains of custody signed by both the relinquisher and receiver of the samples?
See note	Was the carrier identified on the chain of custody?
Yes	If more than one chain of custody was needed for samples, are the chains of custody clearly numbered?
See note	Were samples packed on wet ice, with an expected receipt temperature of 4 ± 2°C?
NA	Were any sample conditions or irregularities (broken bottles, improper temperature) noted on the chain of custody or accompanying paperwork?
Yes	Was the chain of custody submitted as part of the report to the primary contractor?
Yes	Were all requested analyses performed?
Yes	Was adequate sample volume provided to the contractor lab?
NA	If any anomalous behavior of the samples was found, was it noted in the lab case narrative?

Additional sample custody issues or deficiencies:

Samples were logged in prior to field sampling. The login printout acted as the chain of custody for the samples.

Samples were delivered directly to lab from field team.

Samples were stored in a refrigerated trailer with a temperature of 4 ± 2°C, no wet ice was used.

Part I	General Data Reporting Requirements	Included (Y/N)	Comments
SUMMARY TABULAR DATA AND PROJECT NARRATIVE			
Each of the following elements should be present as described.			
	A summary table listing the percent survival in all control, reference, and test samples	Y	
	A summary table containing the LC_{50}/EC_{50} values for the suspended particulate phase (SPP) tests and statistical tests from the solid phase tests	Y	
	A narrative which summarizes all of the deviations from the Green Book/Inland Testing Manual, Regional Implementation Agreement and SAP/QAPP protocols. Deviations of sample handling, test conditions, ammonia purging procedures, control performance, reference toxicant test performance, organism handling/acclimation, and water quality parameters should be provided in this section.	Y	
	A summary table which documents collection dates and holding times for the test, control, and reference sediment samples. Holding times for site water, SPP, and lab saltwater for all tests should be included in this table.	N	
	The data narrative should describe the major biological project activities and results. Computerized tables of results, water quality, and other pertinent information should be placed in this portion of the biological data package.	Y	
RAW BIOLOGICAL AND WATER QUALITY DATA FROM TESTS			
	Survival Data	Y	
	Water Quality Parameters	Y	
	Feeding Schedule and Amount (if applicable)	Y	
	Organism Observations	Y	
	Summary of Test Conditions	Y	
TEST ORGANISM HOLDING, HANDLING AND ACCLIMATION			
	Organism Shipping Data Sheet (or equivalent) if Provided by Supplier	Y	
	Copy of Overnight Shipping Airbill or Courier Tracking Information (if applicable)	NA	
	Holding/Acclimation Records (including any required water quality, renewals, and feeding)	N	
	Mortality During Holding and Acclimation	N	
	Taxonomic Identification for Each Species (where available from vendor)	Y	
REFERENCE TOXICANT DATA (where applicable)			
	Raw Bench Sheets For Reference Toxicant Tests	Y	
	Reference Toxicant Stock & Test Solution Preparation Sheet	Y	
	LC_{50}/EC_{50} Statistical Calculations	Y	
	Updated Reference Toxicant Control Charts with Acceptability Limits	Y	
STATISTICAL DATA FROM DREDGE MATERIAL TESTS			
	Provide all computer-generated statistical output information for the SPP and solid phase tests.	Y	
INVALID TEST DATA			
	If a test was repeated for any reason, the data from the original test must be included in the final report. If a serious deviation occurs which has the potential to affect test acceptability, USACE and EPA must be contacted immediately to determine if a retest is needed.	NA	

Part II	Test-Specific Information (additional to items specified in Part I)	Included (Y/N)	Comments
AMPHIPOD SOLID PHASE TEST			
	Pretest Overlying Water Renewal Log and Total Porewater Ammonia Data	Y	
	Total/Unionized Porewater Ammonia Measured in Dummy Jars During Testing	Y	
MYSID SOLID PHASE TEST			
	Pretest Overlying Water Renewal Log and Total Porewater Ammonia Data	Y	
	Total/Unionized Overlying Unionized Ammonia Measured During Testing	Y	
SUSPENDED PARTICULATE PHASE TESTS (SPP)			
	SPP Preparation Log (All volumes, Mixing Times, Centrifuge Information etc.)	Y	
BIOACCUMULATION TESTING			
	Daily Flow Calibration or Static Renewal Log	N	
	Preparation Logs for All Artificial Saltwater (if applicable)	N	
	If Control Survival <90%, Provide Detailed Narrative	NA	
	Statistical Data Output Information Comparing Test and Reference Tissue Chemistry	Y	
	Time 0 tissue samples collected and archived frozen	Y	
SAMPLING / SAMPLE HANDLING			
	Chain of Custody Forms for All Test, Control, and Reference Samples	Y	
	Field Data Sheets and/or Sampling Logs (Including Photos If Available)	Y	
	Log of Test Sediment Composite Preparation	Y	
	Sieving – Size of Mesh Used for Samples Used in Toxicity Tests/Bioaccumulation specified	Y

Project: PCCA CDP Resample - Inner Harbor MPRSA Section 103

Project Initiation Date: November 16, 2021

Project Sampling Dates:

Begin: January 21, 2023

End: January 27, 2023

Final Report Date:

Final Review Date: June 20, 2023

Data acceptable (Y/N):

If data unacceptable summarize issues to be addressed:

I certify the review in this document conforms to all applicable regulatory and project-specific requirements.

QA Officer

Laboratory Information

Use one sheet for each laboratory that will perform analytical work for this project.

Laboratory Name/Identification: North Water District Laboratory Services

Is lab NELAC certified? Yes/No If Yes, please supply certification number TCEQ T104704238-21-33

Can lab meet the QC requirements below as specified in the SAP/QAPP?

Yes/No	
Yes	Analytical requirement
Yes	Instrumentation
Yes	MDL's meet project TDL requirements
Yes	Precision and accuracy
Yes	Required turnaround time

Note below any requirements the laboratory is unable to meet.

Sediment, elutriate/site water, and tissue chemistry samples were also subcontracted from NWDLS to two other labs listed below:

A&B Labs NELAC accreditation number T104704213

ALS Laboratory in Kelso, WA accreditation number Texas CEQ T104704427

Grain size was subcontracted to Taylor Engineering. No NELAC accreditation is available for grain size.

Sample Custody

Was all required information on the chain-of-custody form:

(Yes/No)	
Yes	Did chain of custody forms accompany samples to subcontract lab?
Yes	Is the project identification on the chain of custody?
No, see note 1.	Are the analyses requested printed on the sample containers?
Yes	Were all samples correctly identified?
Yes	Were the analyses correctly identified on the chain of custody or an attached document listed on the chain of custody?
Yes	Were sample dates and times listed on the chain of custody?
Yes	Were the chains of custody signed by both the relinquisher and receiver of the samples?
Yes	Was the carrier identified on the chain of custody?
Yes	If more than one chain of custody was needed for samples, are the chains of custody clearly numbered?
Yes, see note 2.	Were samples packed on wet ice, with an expected receipt temperature of 4 ± 2°C?
No, see note 3.	Were any sample conditions or irregularities (broken bottles, improper temperature) noted on the chain of custody or accompanying paperwork?
Yes	Was the chain of custody submitted as part of the report to the primary contractor?
Yes	Were all requested analyses performed?
Yes	Was adequate sample volume provided to the contractor lab?
No, see note 3.	If any anomalous behavior of the samples was found, was it noted in the lab case narrative?

Additional sample custody issues or deficiencies:

Note 1. Samples were logged in prior to field sampling. The login printout with analyses acted as the chain of custody for the samples.

Note 2. Samples were stored in the refrigerated trailer or iced in coolers for storage and shipment to NWDLS.

Note 3. No irregularities or anomalous behavior was noted on the report or COCs.

List of Acronyms

CCV	continuing calibration verification
IC	initial calibration
ICB	initial calibration blank
ICV	initial calibration verification
IS	internal standard
LCS/DLCS	laboratory control sample/duplicate laboratory control sample
LDR	linear dynamic range
LFB	laboratory fortified blank
MB	method blank
MDL	method detection limit
MN	*Macoma nasuta*
MS/MSD	matrix spike/matrix spike duplicate
NV	*Neanthes virens*
RL	reporting limit
SAP/QAPP	Sampling and Analysis Plan/Quality Assurance Project Plan
RIA	EPA Region 6 - Regional Implementation Manual
SRM	standard reference material

Parameter: ☐ PAHs ☐ Pesticides ☐ PCBs ☑ SVOCs
Matrix: ☑ Sediment ☐ Water/Elutriate ☐ Tissue

Analytical Method Used: 8270

QC Measurement	Frequency	Acceptance Criteria	Criteria Met (Y/N)	Review Comments	Data Acceptable (Y/N)
MB	1 per 20 samples or 1 per batch up to 20 samples	No analyte should be detected > RL	N	Several compounds across all the batches tested had exceedances above the reporting limit.	
MS/MSD	1 set per 20 samples or per batch	Method-specific spike recovery and RSD precision limits	N	The matrix spikes had exceedances outside the acceptance criteria. The sample with the most exceedances also had high levels of SVOC contaminants, and also indicates a likely matrix interference in the sample. The sample was rerun several times to address the spike recovery exceedances.	
SRM	1 per 20 samples or 1 per batch up to 20 samples	Within limits specified by provider	See note	Used Blank Spike/LCS for SRM. Several compounds had exceedances outside the acceptance criteria. Since the exceedances are generally small, the overall impact is low.	
ICV	Immediately following calibration curve	Method-specific recovery limits	Y	ICV and CCV recoveries are not provided, but the lab report indicates there were no exceedances.	
CCV	At the beginning of every 12 hours of analysis	Method-specific recovery limits	Y		
Surrogates	Every sample	Method-specific recovery limits	See note	Several surrogates were outside the acceptance criteria. The exceedances were generally above the limit, indicating a potential high bias in the sample results. For any results which exceeded the reporting limit, tissue analysis was performed.	
Internal Standard	Every sample	Method-specific recovery limits	NA	Not provided by lab	
IC	Verify after each initial calibration	Method-specific acceptibility limits	Y	Maintained at lab	
MDL	Verify MDL study once per year for each analyte of interest	Updated annually	Y	Maintained at lab

Part I	General Data Reporting Requirements	Included (Y/N)	Comments
SUMMARY TABULAR DATA AND PROJECT NARRATIVE			
Each of the following elements should be present as described.			
	A summary table listing the percent survival in all control, reference, and test samples	Y	
	A summary table containing the LC_{50}/EC_{50} values for the suspended particulate phase (SPP) tests and statistical tests from the solid phase tests	Y	
	A narrative which summarizes all of the deviations from the Green Book/Inland Testing Manual, Regional Implementation Agreement and SAP/QAPP protocols. Deviations of sample handling, test conditions, ammonia purging procedures, control performance, reference toxicant test performance, organism handling/acclimation, and water quality parameters should be provided in this section.	Y	
	A summary table which documents collection dates and holding times for the test, control, and reference sediment samples. Holding times for site water, SPP, and lab saltwater for all tests should be included in this table.	Y	
	The data narrative should describe the major biological project activities and results. Computerized tables of results, water quality, and other pertinent information should be placed in this portion of the biological data package.	Y	
RAW BIOLOGICAL AND WATER QUALITY DATA FROM TESTS			
	Survival Data	Y	
	Water Quality Parameters	Y	
	Feeding Schedule and Amount (if applicable)	Y	
	Organism Observations	Y	
	Summary of Test Conditions	Y	
TEST ORGANISM HOLDING, HANDLING AND ACCLIMATION			
	Organism Shipping Data Sheet (or equivalent) if Provided by Supplier	Y	For species not laboratory grown.
	Copy of Overnight Shipping Airbill or Courier Tracking Information (if applicable)	NA	
	Holding/Acclimation Records (including any required water quality, renewals, and feeding)	Y	For samples not cultured at the laboratory
	Mortality During Holding and Acclimation	N	Mortality not provided, samples held for less than 2 days after receipt for test setup.
	Taxonomic Identification for Each Species (where available from vendor)	Y	Provided by supplier
REFERENCE TOXICANT DATA (where applicable)			
	Raw Bench Sheets For Reference Toxicant Tests	Y	
	Reference Toxicant Stock & Test Solution Preparation Sheet	Y	
	LC_{50}/EC_{50} Statistical Calculations	Y	
	Updated Reference Toxicant Control Charts with Acceptability Limits	Y	
STATISTICAL DATA FROM DREDGE MATERIAL TESTS			
	Provide all computer-generated statistical output information for the SPP and solid phase tests.	Y	
INVALID TEST DATA			
	If a test was repeated for any reason, the data from the original test must be included in the final report. If a serious deviation occurs which has the potential to affect test acceptability, USACE and EPA must be contacted immediately to determine if a retest is needed.	NA	

Part II	Test-Specific Information (additional to items specified in Part I)	Included (Y/N)	Comments
AMPHIPOD SOLID PHASE TEST			
	Pretest Overlying Water Renewal Log and Total Porewater Ammonia Data	Y	
	Total/Unionized Porewater Ammonia Measured in Dummy Jars During Testing	Y	
MYSID SOLID PHASE TEST			
	Pretest Overlying Water Renewal Log and Total Porewater Ammonia Data	Y	
	Total/Unionized Overlying Unionized Ammonia Measured During Testing	Y	
SUSPENDED PARTICULATE PHASE TESTS (SPP)			This information is spread across several different tables, but is present in the report.
	SPP Preparation Log (All volumes, Mixing Times, Centrifuge Information etc.)	Y	
BIOACCUMULATION TESTING			
	Daily Flow Calibration or Static Renewal Log	N	
	Preparation Logs for All Artificial Saltwater (if applicable)	Y	
	If Control Survival <90%, Provide Detailed Narrative	NA	
	Statistical Data Output Information Comparing Test and Reference Tissue Chemistry	Y	
	Time 0 tissue samples collected and archived frozen	Y	
SAMPLING / SAMPLE HANDLING			
	Chain of Custody Forms for All Test, Control, and Reference Samples	Y	The lab report indicates the sediment was sieved for the benthic and bioaccumulation, but the sieve size is not specified.
	Field Data Sheets and/or Sampling Logs (Including Photos If Available)	Y	
	Log of Test Sediment Composite Preparation	Y	
	Sieving – Size of Mesh Used for Samples Used in Toxicity Tests/Bioaccumulation specified	N

RE: PCCA CDP 2022

The following test results meet all NELAP requirements for analytes for which certification is available. Any deviations from our quality system will be noted in the case narrative. All analyses performed by North Water District Laboratory Services, Inc. unless noted.

For questions regarding this report, contact Monica Martin at 936-321-6060.

Sincerely,

Monica O. Martin
Director of Laboratory Services

Samples were received and accepted at NWDLS on 02/15/2022 17:00 through 03/04/2022. Any receiving discrepancies are recorded and stored in NWDLS' database. The samples received a Work Order of 22A3944. The lab sample IDs, client sample IDs, and dates of collection can be found at the top of each result page.

NWDLS provided their lowest detection limit for all requested analyses. Note that detection and reporting limits are adjusted to account for sample specific parameters.

Any QC that did not meet the laboratory specified control limits was flagged and reported with qualifiers. This includes any calibration QC and specific qualifiers include "CB" for any calibration blanks exceeding limits and "C" for any calibration verifications not meeting control limits. For additional information, please refer to the included quality control data pages.

Term and Qualifier Definitions

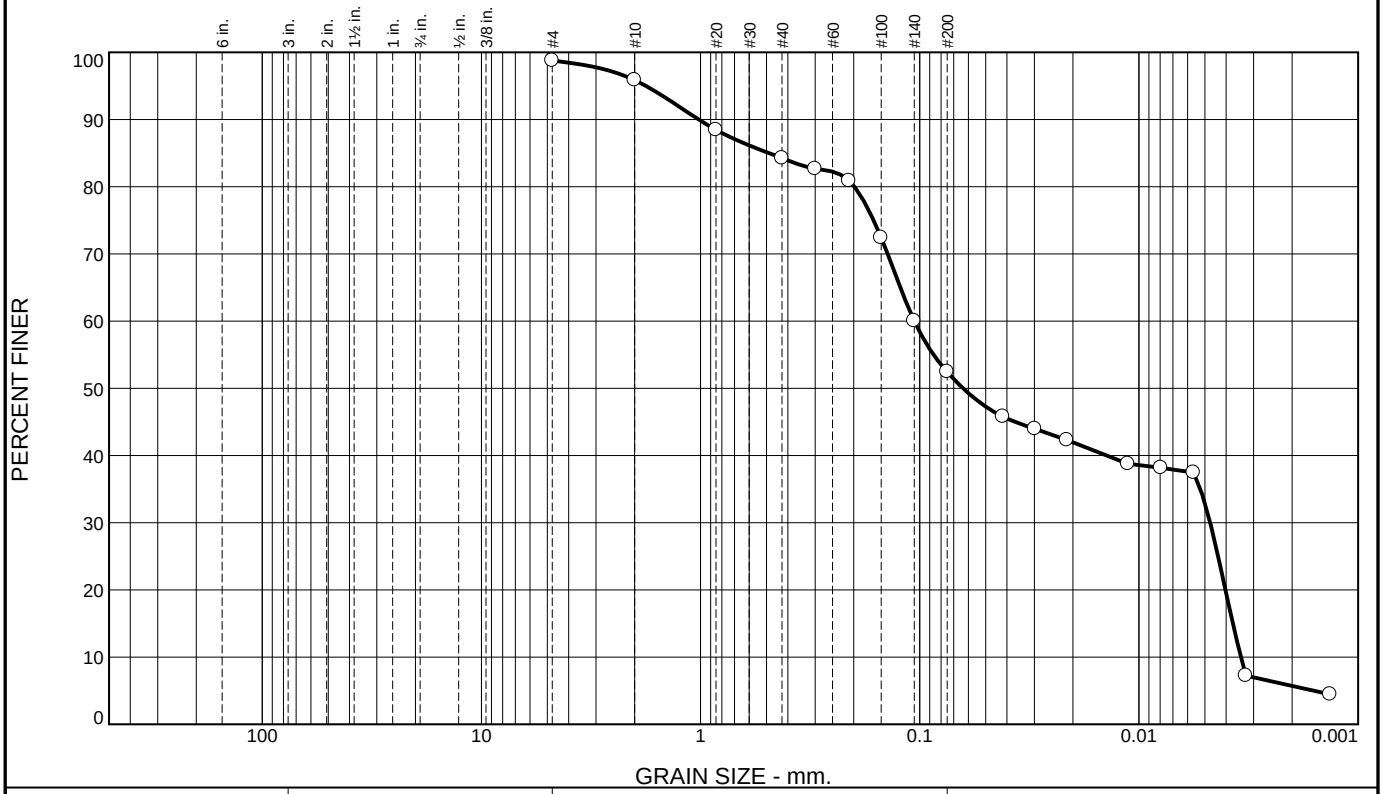
Item	Definition
A	Detection limit elevated due to abundance of non-target analyte.
B	Analyte was found in the associated method blank.
B1	Associated method blank is lower than the established quality control criteria.
CQ	Associated calibration QC is higher than the established quality control criteria for accuracy - no hit in samples; data not affected and acceptable to report.
CQa	Calibration R2 less than 0.99
CQb	CCV out of control high, no hit in sample, data unaffected
CQc	ICAL#1 was removed, so the MRL was raised to ICAL#2 (from 0.5625 to 1.125)
CQd	The analyte was detected in both sample and leach blank
CQe	The analyte was found in the associated leach blank.
H	The parameter was analyzed outside the method specified holding time.
HR	The rerun parameter was analyzed outside the method specified holding time.
J	Estimated value - The reported value is between the detection limit and reporting limit.
J1	Estimated value - The reported value is outside the established quality control criteria for accuracy and/or precision.
L	Off scale high - The concentration of the analyte exceeds the linear range.
R	The sample result was rejected. A rerun is being performed.
S	The surrogate recovery was outside the established laboratory recovery limit.
U	Non-detected compound.
V	Analyte was detected in both sample and method blank.
RPD	Relative Percent Difference
%REC	Percent Recovery
Source	Sample that was matrix spiked or duplicated
*	A = Accredited, N = Not Accredited or Accreditation not available
DF	Dilution Factor - the factor applied to the reported data due to sample preparation, dilution, or moisture content
MDL	Method Detection Limit - The minimum concentration of a substance (or analyte) that can be measured and reported with 99% confidence that the analyte concentration is greater than zero. Based on standard deviation of replicate spiked samples take through all steps of the analytical procedure following 40 CFR Part 136 Appendix B.
SDL	Sample Detection Limit - The minimum concentration of a substance (analyte) that can be measured and reported with 99% confidence that the analyte concentration is greater than zero. The SDL is an adjusted limit thus sample specific and accounts for preparation weights and volumes, dilutions, and moisture content of soil/sediments. If there are no sample specific parameters, the MDL = SDL.
MRL	Method Reporting Limit - Analyte concentration that corresponds to the lowest level lab reports with confidence in accuracy of quantitation and without qualification (i.e. J-flagged). The MRL is at or above the lowest calibration standard.
LRL	Laboratory Reporting Limit - Analyte concentration that corresponds to the lowest level lab reports with confidence in accuracy of quantitation and without qualification (i.e. J-flagged). The LRL is an adjusted limit thus sample specific and accounts for preparation weights and volumes, dilutions, and moisture content of soil/sediments. If there are no sample specific parameters, the MRL = LRL.

April 1, 2022

Ms. Monica Martin

Re: North Water District Laboratory Services, Inc. (NWDLS)
NWDLS Geosciences Lab Testing – Task Order #01
Project #22A3944

The Taylor Engineering Coastal & Marine Geosciences Laboratory is pleased to submit the following sediment data for NWDLS project #22A3944. Taylor Engineering received 13 samples for analysis in Jacksonville, Florida on March 9th, 2022. Laboratory testing included sieve and hydrometer analysis according to ASTM D-422. Attached to this letter are the individual test results for each sample.



If any additional information is needed or if you have any questions, please contact me at (904) 731-7040 or wwarren@taylorengineering.com.

Sincerely,

William Warren, P.G.
Project Geologist
Coastal & Marine Geosciences Lab Manager

May 27, 2022 Revised Service Request No: K2202539.02

Monica Martin
North Water District Lab Services (NWDLS)
130 South Trade Center Parkway
Conroe, TX 77385

Laboratory Results for: 22A3944

Dear Monica,

Enclosed is the revised report of the sample(s) submitted to our laboratory March 10, 2022.

For your reference, these analyses have been assigned our service request number **K2202539.**
Report has been revised to the MDL.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please contact me if you have any questions. My extension is 3260. You may also contact me via email at Luke.Rahn@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Luke Rahn
Project Manager

Client: North Water District Lab Services (NWDLS)
Project: 22A3944
Sample Matrix: Elutriate, Liquid

Service Request: K2202539
Date Received: 03/10/2022

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

Two elutriate, liquid samples were received for analysis at ALS Environmental on 03/10/2022. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

Semivoa GC:

Method ALS SOP Butyltins, 03/25/2021The analysis of Butyltins by ALS SOP requires the use of dual column confirmation. For the Initial Calibration Verification (ICV) at least one of the analytical systems in a dual column or dual detector system must meet the criteria. This criteria was met on one column for Tri-n-butyltin. The data quality was not affected. No further corrective action was necessary.

Method ALS SOP Butyltins, 03/25/2021:Due to interference introduced in the grignard reaction, some sample analytes and surrogates display retention time shifting outside +/-0.03 normally observed in this method and particular matrix. Note that the samples received all the possible cleanups within the scope of the method, the shifting was still within +/-0.06 threshold. The experience of the analyst in the interpretation of chromatograms and the shifts in the QC confirm the analytes. No further corrective action needed.

General Chemistry:

No significant anomalies were noted with this analysis.

Approved by _____ Date 05/27/2022

SAMPLE DETECTION SUMMARY

This form includes only detections above the reporting levels. For a full listing of sample results, continue to the Sample Results section of this Report.

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated value.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.
H	The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

Metals Data Qualifiers

#	The control limit criteria is not applicable.
J	The result is an estimated value.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.
Q	See case narrative. One or more quality control criteria was outside the limits.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimated value.
J	The result is an estimated value.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Revised Service Request No: K2202527.01

Monica Martin
North Water District Lab Services (NWDLS)
130 South Trade Center Parkway
Conroe, TX 77385

Laboratory Results for: 22A3944

Dear Monica,

Enclosed is the revised report of the sample(s) submitted to our laboratory March 09, 2022.

For your reference, these analyses have been assigned our service request number **K2202527.**

Report has been revised to the MDL.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please contact me if you have any questions. My extension is 3260. You may also contact me via email at Luke.Rahn@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Luke Rahn
Project Manager

Client: North Water District Lab Services (NWDLS)
Project: 22A3944
Sample Matrix: Sediment, Ocean Water

Service Request: K2202527
Date Received: 03/09/2022

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

Seven sediment, ocean water samples were received for analysis at ALS Environmental on 03/09/2022. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

Semivoa GC:

Method ALS SOP Butyltins, 03/25/2021The analysis of Butyltins by ALS SOP requires the use of dual column confirmation. For the Initial Calibration Verification (ICV) at least one of the analytical systems in a dual column or dual detector system must meet the criteria. This criteria was met on one column for Tri-n-butyltin. The data quality was not affected. No further corrective action was necessary.

Method ALS SOP Butyltins, 03/25/2021:Due to interference introduced in the grignard reaction, some sample analytes and surrogates display retention time shifting outside +/-0.03 normally observed in this method and particular matrix. Note that the samples received all the possible cleanups within the scope of the method. The experience of the analyst in the interpretation of chromatograms and the shifts in the QC confirm the analytes. No further corrective action needed.

General Chemistry:

No significant anomalies were noted with this analysis.

Approved by  Date 06/02/2022

SAMPLE DETECTION SUMMARY

This form includes only detections above the reporting levels. For a full listing of sample results, continue to the Sample Results section of this Report.

Cooler Receipt and Preservation Form

Client NWDLS Service Request K22 02527

Received: 3/9/22 Opened: 3/9/22 By: [illegible] Unloaded: 3/9/22 By: S

1. Samples were received via? *USPS* *Fed Ex* (*UPS*) *DHL* *PDX* *Courier* *Hand Delivered*
2. Samples were received in: (circle) (*Cooler*) *Box* *Envelope* *Other*_____ *NA*
3. Were custody seals on coolers? NA Y (N) If yes, how many and where? _____
   If present, were custody seals intact? Y N If present, were they signed and dated? Y N

Temp Blank	Sample Temp	IR Gun	Cooler #/COC ID / NA	Out of temp indicate with "X"	PM Notified If out of temp	Tracking Number NA	Filed
—	2.0	1201				1Z 12W 40V 01 9207	
—	2.8	"				9821	
						" " " " 9498 0834	

4. Was a Temperature Blank present in cooler? NA Y (N) If yes, notate the temperature in the appropriate column above:
   If no, take the temperature of a representative sample bottle contained within the cooler; notate in the column "Sample Temp":
5. Were samples received within the method specified temperature ranges? NA (Y) N
   If no, were they received on ice and same day as collected? If not, notate the cooler # below and notify the PM. (NA) Y N

If applicable, tissue samples were received: *Frozen* *Partially Thawed* *Thawed*

6. Packing material: *Inserts* (*Baggies*) (*Bubble Wrap*) *Gel Packs* (*Wet Ice*) *Dry Ice* *Sleeves* _____
7. Were custody papers properly filled out (ink, signed, etc.)? NA (Y) N
8. Were samples received in good condition (unbroken) NA (Y) N
9. Were all sample labels complete (ie, analysis, preservation, etc.)? NA (Y) N
10. Did all sample labels and tags agree with custody papers? NA Y (N)
11. Were appropriate bottles/containers and volumes received for the tests indicated? NA (Y) N
12. Were the pH-preserved bottles (*see SMO GEN SOP*) received at the appropriate pH? *Indicate in the table below* NA (Y) N
13. Were VOA vials received without headspace? *Indicate in the table below.* (NA) Y N
14. Was C12/Res negative? (NA) Y N
15. Were 100ml sterile microbiology bottles filled exactly to the 100ml mark? (NA) Y N Under filled Overfilled

Sample ID on Bottle	Sample ID on COC	Identified by:

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated value.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.
H	The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

Metals Data Qualifiers

#	The control limit criteria is not applicable.
J	The result is an estimated value.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.
Q	See case narrative. One or more quality control criteria was outside the limits.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimated value.
J	The result is an estimated value.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. A complete listing of specific NELAP-certified analytes, can be found in the certification section at www.ALSGlobal.com or at the accreditation bodies web site.
Please refer to the certification and/or accreditation body's web site if samples are submitted for compliance purposes. The states highlighted above, require the analysis be listed on the state certification if used for compliance purposes and if the method/anlayte is offered by that state.

Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board

Sample Name:	22A3944-29	**Units:**	Percent
Lab Code:	K2202527-003	**Basis:**	Dry, per Method
Analysis Method:	9060		
Prep Method:	Method		

		Matrix Spike			Duplicate Matrix Spike					
		K2202527-003MS			K2202527-003DMS					
Analyte Name	**Sample Result**	**Result**	**Spike Amount**	**% Rec**	**Result**	**Spike Amount**	**% Rec**	**% Rec Limits**	**RPD**	**RPD Limit**
Carbon, Total Organic (TOC)	0.02 J	2.46	2.40	101	2.50	2.42	103	70-122	2	20

Results flagged with an asterisk (*) indicate values outside control criteria.

Results flagged with a pound (#) indicate the control criteria is not applicable.

Percent recoveries and relative percent differences (RPD) are determined by the software using values in the calculation which have not been rounded.

Matrix Spike and Matrix Spike Duplicate Data is presented for information purposes only. The matrix may or may not be relevant to samples reported in this report. The laboratory evaluates system performance based on the LCS and LCSD control limits.

Revised Service Request No: K2202313.02

Monica Martin
North Water District Lab Services (NWDLS)
130 South Trade Center Parkway
Conroe, TX 77385

Laboratory Results for: 22A3944

Dear Monica,

Enclosed is the revised reportt of the sample(s) submitted to our laboratory March 05, 2022.

For your reference, these analyses have been assigned our service request number **K2202313.**

Report has been revised to the MDL.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please contact me if you have any questions. My extension is 3260. You may also contact me via email at Luke.Rahn@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Luke Rahn
Project Manager

Client: North Water District Lab Services (NWDLS)
Project: 22A3944
Sample Matrix: Elutriate, Liquid

Service Request: K2202313
Date Received: 03/05/2022

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

Three elutriate, liquid samples were received for analysis at ALS Environmental on 03/05/2022. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

Semivoa GC:

Method ALS SOP Butyltins, 03/25/2021The analysis of Butyltins by ALS SOP requires the use of dual column confirmation. For the Initial Calibration Verification (ICV) at least one of the analytical systems in a dual column or dual detector system must meet the criteria. This criteria was met on one column for Tri-n-butyltin. The data quality was not affected. No further corrective action was necessary.

Method ALS SOP Butyltins, 03/25/2021:Due to interference introduced in the grignard reaction, some sample analytes and surrogates display retention time shifting outside +/-0.03 normally observed in this method and particular matrix. Note that the samples received all the possible cleanups within the scope of the method. The experience of the analyst in the interpretation of chromatograms and the shifts in the QC confirm the analytes. No further corrective action needed.

General Chemistry:

No significant anomalies were noted with this analysis.

Approved by _____ Date 05/27/2022

SAMPLE DETECTION SUMMARY

This form includes only detections above the reporting levels. For a full listing of sample results, continue to the Sample Results section of this Report.

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated value.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.
H	The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

Metals Data Qualifiers

#	The control limit criteria is not applicable.
J	The result is an estimated value.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.
Q	See case narrative. One or more quality control criteria was outside the limits.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimated value.
J	The result is an estimated value.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. A complete listing of specific NELAP-certified analytes, can be found in the certification section at www.ALSGlobal.com or at the accreditation bodies web site.
Please refer to the certification and/or accreditation body's web site if samples are submitted for compliance purposes. The states highlighted above, require the analysis be listed on the state certification if used for compliance purposes and if the method/anlayte is offered by that state.

Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board
CAS Number	Chemical Abstract Service registry Number
CFC	Chlorofluorocarbon
CFU	Colony-Forming Unit
DEC	Department of Environmental Conservation
DEQ	Department of Environmental Quality
DHS	Department of Health Services
DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LOD	Limit of Detection
LOQ	Limit of Quantitation
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

June 02, 2022 Revised Service Request No: K2202311.01

Monica Martin
North Water District Lab Services (NWDLS)
130 South Trade Center Parkway
Conroe, TX 77385

Laboratory Results for: 22A3944

Dear Monica,

Enclosed is the revised report of the sample(s) submitted to our laboratory March 04, 2022.

For your reference, these analyses have been assigned our service request number **K2202311.** Report has been revised to the MDL.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please contact me if you have any questions. My extension is 3260. You may also contact me via email at Luke.Rahn@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Luke Rahn
Project Manager

Client: North Water District Lab Services (NWDLS)
Project: 22A3944
Sample Matrix: Ocean Water

Service Request: K2202311
Date Received: 03/04/2022

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

One ocean water sample was received for analysis at ALS Environmental on 03/04/2022. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The sample was stored at minimum in accordance with the analytical method requirements.

General Chemistry:

No significant anomalies were noted with this analysis.

Approved by _____ Date 06/02/2022

SAMPLE DETECTION SUMMARY

This form includes only detections above the reporting levels. For a full listing of sample results, continue to the Sample Results section of this Report.

Cooler Receipt and Preservation Form

Client NWDLS Service Request K22 02311

Received: 3/14/22 Opened: 3/14/22 By: AP Unloaded: 3/14/22 By: AP

1. Samples were received via? *USPS* *Fed Ex* (*UPS*) *DHL* *PDX* *Courier* *Hand Delivered*
2. Samples were received in: (circle) (*Cooler*) *Box* *Envelope* *Other*_____ *NA*
3. Were custody seals on coolers? NA Y (N) If yes, how many and where? _____
   If present, were custody seals intact? Y N If present, were they signed and dated? Y N

Temp Blank	Sample Temp	IR Gun	Cooler #/COC ID / NA	Out of temp Indicate with "X"	PM Notified If out of temp	Tracking Number NA	Filed
	3.9	IR07				1Z 12W 40V 01 9617 3891	

4. Was a Temperature Blank present in cooler? NA Y (N) If yes, notate the temperature in the appropriate column above:
   If no, take the temperature of a representative sample bottle contained within the cooler; notate in the column "Sample Temp":
5. Were samples received within the method specified temperature ranges? NA (Y) N
   If no, were they received on ice and same day as collected? If not, notate the cooler # below and notify the PM. (NA) Y N

If applicable, tissue samples were received: *Frozen* *Partially Thawed* *Thawed*

6. Packing material: *Inserts* *Baggies* *Bubble Wrap* *Gel Packs* (*Wet Ice*) *Dry Ice* *Sleeves* _____
7. Were custody papers properly filled out (ink, signed, etc.)? NA (Y) N
8. Were samples received in good condition (unbroken) NA (Y) N
9. Were all sample labels complete (ie, analysis, preservation, etc.)? NA (Y) N
10. Did all sample labels and tags agree with custody papers? NA (Y) N
11. Were appropriate bottles/containers and volumes received for the tests indicated? NA (Y) N
12. Were the pH-preserved bottles (*see SMO GEN SOP*) received at the appropriate pH? *Indicate in the table below* NA (Y) N
13. Were VOA vials received without headspace? *Indicate in the table below.* (NA) Y N
14. Was C12/Res negative? (NA) Y N
15. Were 100ml sterile microbiology bottles filled exactly to the 100ml mark? (NA) Y N Under filled Overfilled

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated value.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.
H	The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

Metals Data Qualifiers

#	The control limit criteria is not applicable.
J	The result is an estimated value.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.
Q	See case narrative. One or more quality control criteria was outside the limits.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimated value.
J	The result is an estimated value.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

June 02, 2022 Revised Service Request No: K2202218.01

Monica Martin
North Water District Lab Services (NWDLS)
130 South Trade Center Parkway
Conroe, TX 77385

Laboratory Results for: 22A3944

Dear Monica,

Enclosed is the revised report of the sample(s) submitted to our laboratory March 03, 2022.

For your reference, these analyses have been assigned our service request number **K2202218.**

Report has been revised to the MDL.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please contact me if you have any questions. My extension is 3260. You may also contact me via email at Luke.Rahn@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Luke Rahn
Project Manager

Client: North Water District Lab Services (NWDLS)
Project: 22A3944
Sample Matrix: Sediment, Ocean Water

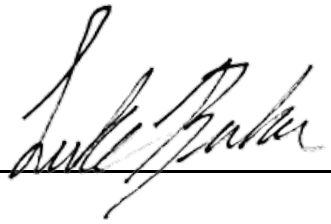
Service Request: K2202218
Date Received: 03/03/2022

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

Four sediment, ocean water samples were received for analysis at ALS Environmental on 03/03/2022. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.



Semivoa GC:

Method ALS SOP: The analysis of Butyltins by ALS SOP requires the use of dual column confirmation. When the Continuing Calibration Verification (CCV) criterion is met for both columns, the lower of the two sample results is generally reported. The primary evaluation criteria were not met on the confirmation column for the surrogate compound Tri-n-propyltin. The results were reported from the column with an acceptable CCV. The data quality was not affected. No further corrective action was necessary.
Method ALS SOP: The analysis of Butyltins by ALS SOP requires the use of dual column confirmation. For the Initial Calibration Verification (ICV) at least one of the analytical systems in a dual column or dual detector system must meet the criteria. This criteria was met on one column for Tri-n-butyltin. The data quality was not affected. No further corrective action was necessary.

Method ALS SOP:The Relative Percent Difference (RPD) for Di-n-butyltin in the replicate Laboratory Control Sample (LCS) analyses (KQ2203383-01 and -02) was outside control criteria:. Recoveries of the individual analytes were within control criteria. The data was flagged to indicate the problem.
Method ALS SOP:The upper control criterion was exceeded for Tetra-n-butyltin in Continuing Calibration Verification (CCV). The field samples analyzed in this sequence did not contain the analyte in question. Since the apparent problem indicated a potential high bias, the data quality was not affected. No further corrective action was required.

General Chemistry:

No significant anomalies were noted with this analysis.

Approved by  Date 06/02/2022

SAMPLE DETECTION SUMMARY

This form includes only detections above the reporting levels. For a full listing of sample results, continue to the Sample Results section of this Report.

Cooler Receipt and Preservation Form

Client NWDLS Service Request K22 02218

Received: 3/3/22 Opened: 3/3/22 By: CG Unloaded: 3/3/22 By: CG

1. Samples were received via? *USPS* *Fed Ex* (*UPS*) *DHL* *PDX* *Courier* *Hand Delivered*
2. Samples were received in: (circle) (*Cooler*) *Box* *Envelope* *Other*_____ *NA*
3. Were custody seals on coolers? NA Y (N) If yes, how many and where? _____
   If present, were custody seals intact? Y N If present, were they signed and dated? Y N

Temp Blank	Sample Temp	IR Gun	Cooler #/COC ID / NA	Out of temp indicate with "X"	PM Notified If out of temp	Tracking Number NA	Filed
—	1.5	IR02		—		1Z12W40V0193695805	

4. Was a Temperature Blank present in cooler? NA Y (N) If yes, notate the temperature in the appropriate column above:
   If no, take the temperature of a representative sample bottle contained within the cooler; notate in the column "Sample Temp":
5. Were samples received within the method specified temperature ranges? NA (Y) N
   If no, were they received on ice and same day as collected? If not, notate the cooler # below and notify the PM. (NA) Y N

If applicable, tissue samples were received: *Frozen* *Partially Thawed* *Thawed*

6. Packing material: *Inserts* (*Baggies*) (*Bubble Wrap*) *Gel Packs* (*Wet Ice*) *Dry Ice* *Sleeves* _____
7. Were custody papers properly filled out (ink, signed, etc.)? NA (Y) N
8. Were samples received in good condition (unbroken) NA (Y) N
9. Were all sample labels complete (ie, analysis, preservation, etc.)? NA (Y) N
10. Did all sample labels and tags agree with custody papers? NA (Y) N
11. Were appropriate bottles/containers and volumes received for the tests indicated? NA (Y) N
12. Were the pH-preserved bottles (*see SMO GEN SOP*) received at the appropriate pH? *Indicate in the table below* NA Y N
13. Were VOA vials received without headspace? *Indicate in the table below.* (NA) Y N
14. Was C12/Res negative? (NA) Y N
15. Were 100ml sterile microbiology bottles filled exactly to the 100ml mark? (NA) Y N Under filled Overfilled

Sample ID on Bottle	Sample ID on COC	Identified by:

Sample ID	Bottle Count Bottle Type	Head-space	Broke	pH	Reagent	Volume added	Reagent Lot Number	Initials	Time

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated value.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.
H	The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

Metals Data Qualifiers

#	The control limit criteria is not applicable.
J	The result is an estimated value.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.
Q	See case narrative. One or more quality control criteria was outside the limits.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimated value.
J	The result is an estimated value.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. A complete listing of specific NELAP-certified analytes, can be found in the certification section at www.ALSGlobal.com or at the accreditation bodies web site.
Please refer to the certification and/or accreditation body's web site if samples are submitted for compliance purposes. The states highlighted above, require the analysis be listed on the state certification if used for compliance purposes and if the method/anlayte is offered by that state.

Acronyms

ASTM	American Society for Testing and Materials

May 27, 2022 Revised Service Request No: K2202145.01

Monica Martin
North Water District Lab Services (NWDLS)
130 South Trade Center Parkway
Conroe, TX 77385

Laboratory Results for: 22A3944

Dear Monica,

Enclosed is the revised reort of the sample(s) submitted to our laboratory March 02, 2022.

For your reference, these analyses have been assigned our service request number **K2202145.**

Report has been revised to the MDL.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please contact me if you have any questions. My extension is 3260. You may also contact me via email at Luke.Rahn@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Luke Rahn
Project Manager

Client: North Water District Lab Services (NWDLS)
Project: 22A3944
Sample Matrix: Elutriate, Liquid, Ocean Water

Service Request: K2202145
Date Received: 03/02/2022

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

Two elutriate, liquid, ocean water samples were received for analysis at ALS Environmental on 03/02/2022. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

Semivoa GC:

Method ALS SOP:The upper control criterion was exceeded for Tetra-n-butyltin in Continuing Calibration Verification (CCV). The field samples analyzed in this sequence did not contain the analyte in question. Since the apparent problem indicated a potential high bias, the data quality was not affected. No further corrective action was required.

Method ALS SOP:The analysis of Butyltins by ALS SOP requires the use of dual column confirmation. When the Continuing Calibration Verification (CCV) criterion is met for both columns, the lower of the two sample results is generally reported. The primary evaluation criteria were not met on the confirmation column for the surrogate compound Tri-n-propyltin. The results were reported from the column with an acceptable CCV. The data quality was not affected. No further corrective action was necessary.
Method ALS SOP:Sample 22A3944-08 was received past holding time. The analysis was performed as soon as possible after receipt by the laboratory. The data was flagged to indicate the holding time violation.
Method ALS SOP:The analysis of ALS SOP Butyltins requires the use of dual column confirmation. For the Initial Calibration Verification (ICV) at least one of the analytical systems in a dual column or dual detector system must meet the criteria. This criteria was met on one column for Tri-n-butyltin. The data quality was not affected. No further corrective action was necessary.

General Chemistry:

No significant anomalies were noted with this analysis.

Cooler Receipt and Preservation Form

Client NWDLS Service Request K22 02145

Received: 3/2/22 Opened: 3/2/22 By: ZH Unloaded: 3/2/22 By: ZH

1. Samples were received via? *USPS* *Fed Ex* *UPS* *DHL* *PDX* *Courier* *Hand Delivered*
2. Samples were received in: (circle) *Cooler* *Box* *Envelope* *Other* _____ *NA*
3. Were custody seals on coolers? NA Y N If yes, how many and where? _____
   If present, were custody seals intact? Y N If present, were they signed and dated? Y N

Temp Blank	Sample Temp	IR Gun	Cooler #/COC ID / NA	Out of temp Indicate with "X"	PM Notified If out of temp	Tracking Number NA	Filed
	2.9	IR01				122040v019795 70888	

4. Was a Temperature Blank present in cooler? NA Y N If yes, notate the temperature in the appropriate column above:
   If no, take the temperature of a representative sample bottle contained within the cooler; notate in the column "Sample Temp":
5. Were samples received within the method specified temperature ranges? NA Y N
   If no, were they received on ice and same day as collected? If not, notate the cooler # below and notify the PM. NA Y N

If applicable, tissue samples were received: *Frozen* *Partially Thawed* *Thawed*

6. Packing material: *Inserts* *Baggies* *Bubble Wrap* *Gel Packs* *Wet Ice* *Dry Ice* *Sleeves* _____
7. Were custody papers properly filled out (ink, signed, etc.)? NA Y N
8. Were samples received in good condition (unbroken) NA Y N
9. Were all sample labels complete (ie, analysis, preservation, etc.)? NA Y N
10. Did all sample labels and tags agree with custody papers? NA Y N
11. Were appropriate bottles/containers and volumes received for the tests indicated? NA Y N
12. Were the pH-preserved bottles (*see SMO GEN SOP*) received at the appropriate pH? *Indicate in the table below* NA Y N
13. Were VOA vials received without headspace? *Indicate in the table below.* NA Y N
14. Was C12/Res negative? NA Y N
15. Were 100ml sterile microbiology bottles filled exactly to the 100ml mark? NA Y N Under filled Overfilled

Sample ID on Bottle	Sample ID on COC	Identified by:

Sample ID	Bottle Count Bottle Type	Head-space	Broke	pH	Reagent	Volume added	Reagent Lot Number	Initials	Time

Notes, Discrepancies, Resolutions: Did not receive CN or TOC containers for 22A3944-08
:Did not receive SHORT HOLD TIME Dibutyltin & TOC cont For 22A3944-21

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated value.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.
H	The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

Metals Data Qualifiers

#	The control limit criteria is not applicable.
J	The result is an estimated value.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.
Q	See case narrative. One or more quality control criteria was outside the limits.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimated value.
J	The result is an estimated value.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Laboratory Results for: 22A3944

Dear Monica,

Enclosed is the revised report of the sample(s) submitted to our laboratory February 26, 2022.

For your reference, these analyses have been assigned our service request number **K2201845.** Report has been revised to the MDL.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at www.alsglobal.com. All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please contact me if you have any questions. My extension is 3260. You may also contact me via email at Luke.Rahn@alsglobal.com.

Respectfully submitted,

ALS Group USA, Corp. dba ALS Environmental

Luke Rahn

Client: North Water District Lab Services (NWDLS)
Service Request: K2201845
Project: 22A3944
Date Received: 02/21/2022 - 02/26/2022
Sample Matrix: Sediment, Ocean Water, Elutriate, Liquid

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

Sample Receipt:

Twelve sediment, ocean water, elutriate, liquid samples were received for analysis at ALS Environmental on 02/21/2022 - 02/26/2022. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

Semivoa GC:

Method ALS SOP:The upper control criterion was exceeded for surrogate compound, Tri-n-propyltin, and Tetra-n-butlytin in Continuing Calibration Verification (CCV). The field samples analyzed in this sequence did not contain any target analytes. Since the apparent problem indicated a potential high bias, the data quality was not affected. No further corrective action was required.
Method ALS SOP:Samples were received past holding time. The analysis was performed as soon as possible after receipt by the laboratory. The data was flagged to indicate the holding time violation.
Method ALS SOP:The analysis of Butyltins by ALS SOP requires the use of dual column confirmation. When the Continuing Calibration Verification (CCV) criterion is met for both columns, the lower of the two sample results is generally reported. The primary evaluation criteria were not met on the confirmation column for the surrogate compound Tri-n-propyltin. The results were reported from the column with an acceptable CCV. The data quality was not affected. No further corrective action was necessary.
Method ALS SOP:The analysis of ALS SOP Butyltins requires the use of dual column confirmation. For the Initial Calibration Verification (ICV) at least one of the analytical systems in a dual column or dual detector system must meet the criteria. This criteria was met on one column for Tri-n-butyltin. The data quality was not affected. No further corrective action was necessary.
Method ALS SOP:The Relative Percent Difference (RPD) for n-butyltin in the replicate Laboratory Control Sample (LCS) analyses (KQ2203083-01 and -02) was outside control criteria: Recoveries for the individual analytes was within control limits. The data was flagged to indicate the problem.

Method ALS SOP:The Relative Percent Difference (RPD) for Di-n-butyltin in the replicate Laboratory Control Sample (LCS) analyses (KQ2203383-01 and -02) was outside control criteria: Recoveries for the individual analytes was within control limits. The data was flagged to indicate the problem.

Method ALS SOP:Due to a extraction error the Method Blank KQ2203312-04, Laboratory Control Sample KQ2203312-03, Matrix Spike KQ2203312-01, Duplicate Matrix Spike KQ2203312-02 and
sample 22A3944-36 were taken to the incorrect final volume. A dilution was performed on the effected finished samples to correct the error.
Method ALS SOP: Samples 22A3944-10 and 22A3944-21 had retention time shifting outside of 0.03 minutes. The associated Method Blank and Laboratory Control Sample were also shifted outside the 0.03 minute window. Recoveries were within control limits. The data was not significantly effected.

General Chemistry:

No significant anomalies were noted with this analysis.

Approved by _____ Date 06/02/2022

SAMPLE DETECTION SUMMARY

Inorganic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
E	The result is an estimate amount because the value exceeded the instrument calibration range.
J	The result is an estimated value.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.
H	The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

Metals Data Qualifiers

#	The control limit criteria is not applicable.
J	The result is an estimated value.
E	The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
M	The duplicate injection precision was not met.
N	The Matrix Spike sample recovery is not within control limits. See case narrative.
S	The reported value was determined by the Method of Standard Additions (MSA).
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
W	The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
i	The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
X	See case narrative.
+	The correlation coefficient for the MSA is less than 0.995.
Q	See case narrative. One or more quality control criteria was outside the limits.

Organic Data Qualifiers

*	The result is an outlier. See case narrative.
#	The control limit criteria is not applicable. See case narrative.
A	A tentatively identified compound, a suspected aldol-condensation product.
B	The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
C	The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
D	The reported result is from a dilution.
E	The result is an estimated value.
J	The result is an estimated value.
N	The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
P	The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
U	The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL. *DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
i	The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
X	See case narrative.
Q	See case narrative. One or more quality control criteria was outside the limits.

Additional Petroleum Hydrocarbon Specific Qualifiers

F	The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
L	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
H	The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
O	The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
Y	The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
Z	The chromatographic fingerprint does not resemble a petroleum product.

Tri-n-butyltin Cation	0.53 J	15.0	27.1	53	13.0	26.8	47	10-186	14	40

Results flagged with an asterisk (*) indicate values outside control criteria.

Results flagged with a pound (#) indicate the control criteria is not applicable.

Percent recoveries and relative percent differences (RPD) are determined by the software using values in the calculation which have not been rounded.

Matrix Spike and Matrix Spike Duplicate Data is presented for information purposes only. The matrix may or may not be relevant to samples reported in this report. The laboratory evaluates system performance based on the LCS and LCSD control limits.

RE: PCCA CDP TISSUE CHEM

The following test results meet all NELAP requirements for analytes for which certification is available. Any deviations from our quality system will be noted in the case narrative. All analyses performed by North Water District Laboratory Services, Inc. unless noted.

For questions regarding this report, contact Monica Martin at 936-321-6060.

Sincerely,

Monica O. Martin
Chief Administrative Officer

NTP was granted to NWDLS on 06/21/2022 16:00. Samples were held in freezer storage until analysis began. Any receiving discrepancies are recorded and stored in NWDLS' database. The samples received a Work Order of 22F4240. The lab sample IDs, client sample IDs, and dates of collection can be found at the top of each result page.

NWDLS provided their lowest detection limit for all requested analyses. Note that detection and reporting limits are adjusted to account for sample specific parameters.

Any QC that did not meet the laboratory specified control limits was flagged and reported with qualifiers. For additional information, please refer to the included quality control data pages.

Term and Qualifier Definitions

Item	Definition
H	The parameter was analyzed outside the method specified holding time.
J	Estimated value - The reported value is between the detection limit and reporting limit.
J1	Estimated value - The reported value is outside the established quality control criteria for accuracy and/or precision.
L	Off scale high - The concentration of the analyte exceeds the linear range.
S	The surrogate recovery was outside the established laboratory recovery limit.
U	Non-detected compound.
V	Analyte was detected in both sample and method blank.
RPD	Relative Percent Difference
%REC	Percent Recovery
Source	Sample that was matrix spiked or duplicated
*	A = Accredited, N = Not Accredited or Accreditation not available
DF	Dilution Factor - the factor applied to the reported data due to sample preparation, dilution, or moisture content
MDL	Method Detection Limit - The minimum concentration of a substance (or analyte) that can be measured and reported with 99% confidence that the analyte concentration is greater than zero. Based on standard deviation of replicate spiked samples take through all steps of the analytical procedure following 40 CFR Part 136 Appendix B.
SDL	Sample Detection Limit - The minimum concentration of a substance (analyte) that can be measured and reported with 99% confidence that the analyte concentration is greater than zero. The SDL is an adjusted limit thus sample specific and accounts for preparation weights and volumes, dilutions, and moisture content of soil/sediments. If there are no sample specific parameters, the MDL = SDL.
MRL	Method Reporting Limit - Analyte concentration that corresponds to the lowest level lab reports with confidence in accuracy of quantitation and without qualification (i.e. J-flagged). The MRL is at or above the lowest calibration standard.
LRL	Laboratory Reporting Limit - Analyte concentration that corresponds to the lowest level lab reports with confidence in accuracy of quantitation and without qualification (i.e. J-flagged). The LRL is an adjusted limit thus sample specific and accounts for preparation weights and volumes, dilutions, and moisture content of soil/sediments. If there are no sample specific parameters, the MRL = LRL.

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
H	Sample was prepped or analyzed beyond the specified holding time
H3	Sample was received and analyzed past holding time.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

No additional comments.

Receipt
The samples were received on 7/19/2022 3:54 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.5º C.

GC Semi VOA
Method TX 1005: The following samples were received outside of holding time: 22F4240-01 (860-30002-1), 22F4240-02 (860-30002-2), 22F4240-03 (860-30002-3), 22F4240-04 (860-30002-4), 22F4240-09 (860-30002-9), 22F4240-12 (860-30002-12), 22F4240-12 (860-30002-12[MS]) and 22F4240-12 (860-30002-12[MSD]).

Method TX 1005: The method blank for preparation batch 860-67196 and analytical batch 860-67151 contained >C12-C28 Range Hydrocarbons above the method detection limit. This target analyte concentration was less than the reporting limit (RL). This method blank was extracted using fish tissue provided by the client. Our in-house method blank did not have recoveries above the MDL and is reported with the data.

Method TX 1005: Surrogate o-Terphenyl (Surr) recovery for the following samples were outside the upper control limit: 22F4240-06 (860-30002-6) and 22F4240-08 (860-30002-8). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

Method TX 1005: The following samples were received outside of holding time: 22F4240-14 (860-30002-14), 22F4240-15 (860-30002-15), 22F4240-16 (860-30002-16), 22F4240-17 (860-30002-17), 22F4240-19 (860-30002-19) and 22F4240-20 (860-30002-20).

Method TX 1005: The following samples were received outside of holding time: 22F4240-05 (860-30002-5), 22F4240-06 (860-30002-6), 22F4240-07 (860-30002-7), 22F4240-08 (860-30002-8), 22F4240-10 (860-30002-10), 22F4240-11 (860-30002-11) and 22F4240-13 (860-30002-13).

Method TX 1005: The following samples were received outside of holding time: 22F4240-05 (860-30002-5), 22F4240-06 (860-30002-6), 22F4240-07 (860-30002-7), 22F4240-08 (860-30002-8), 22F4240-10 (860-30002-10), 22F4240-11 (860-30002-11) and 22F4240-13 (860-30002-13).

Method TX 1005: The following samples were received outside of holding time: 22F4240-14 (860-30002-14), 22F4240-15 (860-30002-15), 22F4240-16 (860-30002-16), 22F4240-17 (860-30002-17), 22F4240-19 (860-30002-19) and 22F4240-20 (860-30002-20).

Method TX 1005: The method blank for preparation batch 860-67758 and analytical batch 860-67674 contained Over C12-C28 above the method detection limit. This target analyte concentration was less than the reporting limit (RL). Re-extraction of samples was not possible since only one container was received per sample. The lab extracted a MB using our usual blank matrix and the MB was clean, therefore, the contamination in this MB is suspected to have come from the fish tissue submitted by the client and used for the preparation of this MB.

Method TX 1005: The following samples were received outside of holding time: 22F4240-18 (860-30002-18), 22F4240-21 (860-30002-21), 22F4240-22 (860-30002-22), 22F4240-23 (860-30002-23), 22F4240-24 (860-30002-24), 22F4240-25 (860-30002-25), 22F4240-26 (860-30002-26), 22F4240-27 (860-30002-27), 22F4240-28 (860-30002-28), 22F4240-29 (860-30002-29), 22F4240-30 (860-30002-30), 22F4240-31 (860-30002-31), 22F4240-32 (860-30002-32), 22F4240-33 (860-30002-33), 22F4240-34 (860-30002-34), 22F4240-35 (860-30002-35), 22F4240-36 (860-30002-36) and 22F4240-37 (860-30002-37).

Method TX 1005: The following samples were received outside of holding time: 22F4240-38 (860-30002-38), 22F4240-39 (860-30002-39), 22F4240-40 (860-30002-40), 22F4240-41 (860-30002-41), 22F4240-42 (860-30002-42), 22F4240-43 (860-30002-43),

Job ID: 860-30002-1 (Continued)

Laboratory: Eurofins Houston (Continued)

22F4240-44 (860-30002-44), 22F4240-45 (860-30002-45) and 22F4240-46 (860-30002-46).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True

RE: PCCA HI TISSUE CHEM

The following test results meet all NELAP requirements for analytes for which certification is available. Any deviations from our quality system will be noted in the case narrative. All analyses performed by North Water District Laboratory Services, Inc. unless noted.

For questions regarding this report, contact Monica Martin at 936-321-6060.

Sincerely,

Monica O. Martin

discrepancies are recorded and stored in NWDLS' database. The samples received a Work Order of 22F4225. The lab sample IDs, client sample IDs, and dates of collection can be found at the top of each result page.

NWDLS provided their lowest detection limit for all requested analyses. Note that detection and reporting limits are adjusted to account for sample specific parameters.

Any QC that did not meet the laboratory specified control limits was flagged and reported with qualifiers. For additional information, please refer to the included quality control data pages.
