

Sample Drawings and Vicinity Maps for a Permit Application

Note: The following are examples of typical plans. More information may be requested as determined on a case by case basis.

Vicinity Map

A vicinity or location map showing the site of the proposed activity. The site must be clearly marked and shown in relation to the nearest major roads, cities, and waterways in the area. The map needs to have enough information to allow someone to look at the map and be able to get to the site without requesting more information. Maps and all drawings must be in black and white only on 8.5 x 11-inch paper. Maps must have a title block and number scheme (sheet ___ of ___). If more than one map is required, they may be on separate sheets. If they are submitted on one sheet they both must be legible.

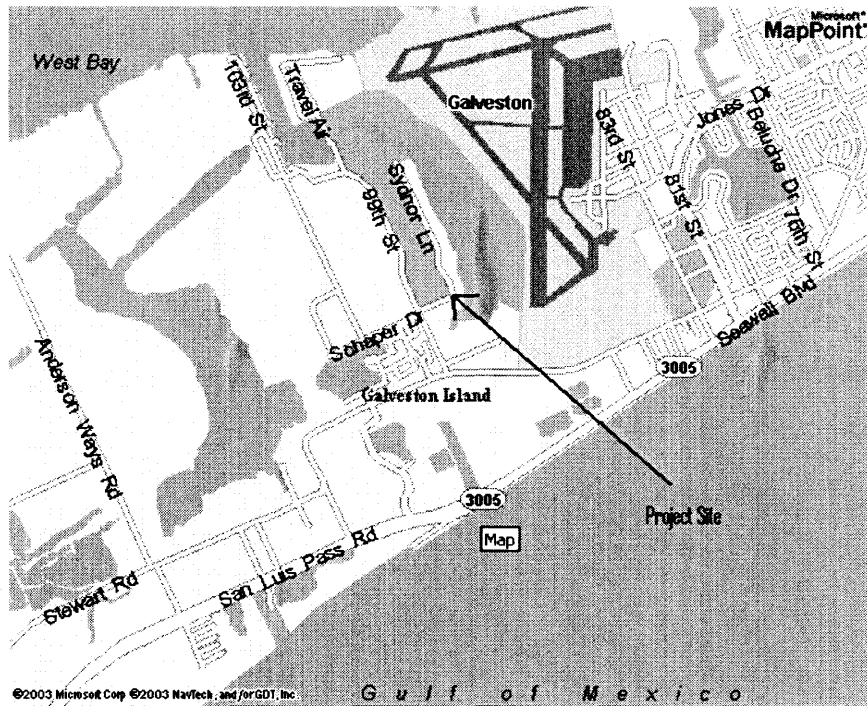

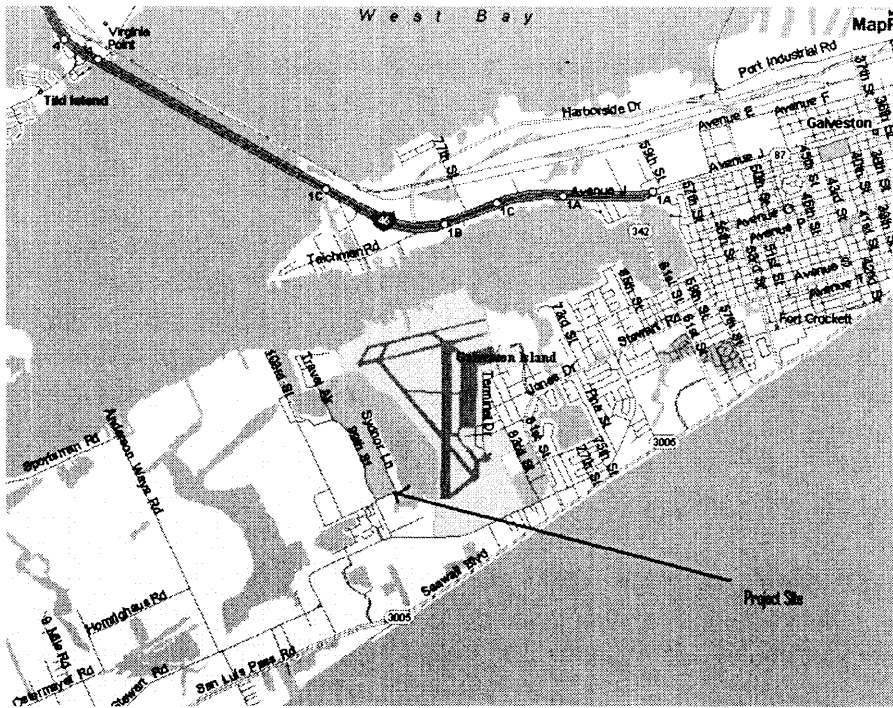

Map sources include:

- United States Coast and Geodetic Survey Charts
- State or County Maps
- United States Geological Survey (USGS) maps
- Key maps

Maps are also available on the internet:

- www.topozone.com
- www.mapblast.com
- www.mapquest.com
- www.expedia.com
- <http://maps.yahoo.com>

See the next page for an example of a vicinity map:

Driving Instructions to Project Site: From Broadway (Hwy 45) travel south on 61st Street to Stewart Road. Turn right on Stewart Road to 99th Street. Turn right on Sydnor Lane. Travel on Sydnor Lane to the point where the road makes a northbound 90 degree turn. The drainage ditch is located south of Sydnor Lane where Sydnor lane makes the northbound 90 degree turn.
